Kam: Inoveca <inoveca@gmail.com>

Dear Kestutis,

Please find attached two pictures of the inside of the Prima DNT ergo head.

If I calculate, the heart distance between the two circles is 22 mm.

Dimension A is 3 mm

Dimension B is 19 mm

Two times half the circle (B) is  $2 * 9,5 \text{ mm} = 19 \text{ mm}$  plus A (3 mm) makes 22 mm.

Hopefully this makes sense.

Kind regards / Met vriendelijke groet / Mit freundlichen Grüßen,

Eugene Dams

Sales manager

**Onderwerp:** Fwd: Dimensions between eyepieces in head

Sorry for my mistake with 23mm.

I ask documentation about STEREO BASE of Prima DNT. Please see Leica M320 - Stereo base 24 mm.

Regards

Dear Eugene,

I ask manufacturer technical documents for tender, that distance between eyepieces is 23 mm. see photo.
