

Uni-Graft® K DV

WARP-KNITTED, IMPREGNATED VASCULAR PROSTHESES

Uni-Graft® K DV

Uni-Graft® K DV is a warp-knitted, double velour vascular prosthesis made of polyester, which has been impregnated with absorbable modified bovine gelatine. This treatment reduces the initial porosity of the textile prosthesis to a „zero porosity“ at the time of implantation.

Indications

Reconstructive procedure on the aorta and in the peripheral area with a diameter of at least 6 mm and the axillo (bi)femoral bypass; also usable in patients requiring systemic heparinization, in patients with coagulation disturbances and in emergency patients.

Product features

- true zero-porosity at the time of implantation
- biocompatible aldehyde free impregnation technology
- double velour structure ensures good healing of the graft
- high suture retention force
- proven performance for more than 30 years
