The image shows a complex industrial piping system outdoors. A large, horizontal, light-colored pipe runs across the middle. A vertical pipe of the same material and color joins it from the top. To the left, another vertical pipe is visible. In the background, there are more pipes, some wrapped in insulation, and a metal structure. The ground is covered with dry grass and some concrete blocks. Red arrows and a red circle are used to highlight specific features: one arrow points to a joint on the horizontal pipe, another points to a new section of pipe, and a third points to a joint on the left. A red circle is placed on the horizontal pipe near the joint highlighted by the second arrow.
