

Enhanced I-beam and blade design

“P3H” Design

6.2.2/ 6.3.2/ 6.4.2 Kasetėje integruotas peilis.

- The multi-blade cutter of the traditional product is fixed by the pin, while the “P3H”, “Fix Anvil” product employs an integrated cutter fixed by welding.
- The cutting blade of the traditional product is 300 series stainless steel, while the new product adopts 400 series stainless steel.

The strengthened I-beam and blade are strong and non-deformable when cutting thick tissue , ensuring smooth firing.
