Caulk® Conditioner 34%

Phosphoric acid for etching of the enamel and dentine before restorations and fissure sealings.

Tooth Conditioner Gel in Syringes 646125

- Includes:
- 2 x Syringes, 3ml each
 - 25 x Applicator Tips

Tooth Conditioner Gel in Bottles 646100

- 2 x Bottles, 6ml each

Tooth Gel Applicator Tip Refill 646126

- 25 x Applicator Tips

Adhesive Systems

Xeno® IV One Component Light Cured Self Etching Bond

Xeno IV is a one component light cured self etching and self priming dental adhesive. Xeno IV is designed to bond composite and compomer materials to enamel and dentine, as well as to repair metals and ceramic. The reduction of components and treatment steps minimises technique sensitivity, achieves high bond strengths* and protects against microleakage whilst minimising the risk of post-operative sensitivity. Xeno IV is fluoride releasing.

Xeno IV Introductory Kit 668001

- Includes:
- 1 x Xeno IV 4.5ml Bottle
 - 100 x Applicator Tips
 - 1 x Dappen Dish
 - 1 x Technique Guide
 - 1 x Directions For Use

Xeno IV Dual Cure Introductory Kit 668010

- Includes:
- 1 x Xeno IV 4.5ml Bottle
 - 1 x Self Cure Activator Bottle
 - 100 x Applicator Tips
 - 1 x Dappen Dish
 - 1 x Technique Guide
 - 1 x Directions For Use

Xeno IV Unit Dose Package 668002

- Includes:
- 100 x Xeno IV Unit Doses
 - 3 x Unit Dose Holders
 - 100 x Applicator Tips
 - 1 x Technique Guide
 - 1 x Directions For Use

XP Bond™ eXtra Performance Universal Total-Etch Adhesive

XP Bond is a one bottle, one coat system indicated for all direct restorations and when combined with the Self Cure Activator, becomes a universal adhesive for all indications and techniques. XP Bond stands for eXtra Performance because it offers bonding excellence*, easy handling, technique tolerance and true universal use capabilities.

XP Bond Refill

60667281

Includes:

- 1 x Bottle XP Bond, 5ml
- 50 x Applicator Tips
- 1 x CliXdish™

XP Bond Unit Dose Refill

693002

Includes:

- 100 x XP Bond Unit Doses
- 2 x 50 Applicator tips
- 3 x CliXdishes

Prime&Bond® NT™ Nanotechnology Total-etch Dental Adhesive

Prime&Bond NT is a universal dental adhesive designed to bond composite and compomer materials to enamel and dentine as well as to metals and ceramic. It contains nano-fillers to support the natural components of dentine.

Prime&Bond NT Refill

60667240

- 2 x Bottles of Prime&Bond NT, 4.5ml each

Applicator Tips (Flex)

60667198

- Refill 100 pcs

Prime&Bond® NT quix™ Unit Dose

Prime&Bond NT quix unit dose delivery system provides a hygienic and fast application.

Prime&Bond NT quix Refill

634356

Includes:

- 10ml Prime&Bond NT in 80 quix – Unit Dose
- 2 x quix Holders
- 100 x Applicator Tips

Adhesive Systems

Product Code

Self Cure Activator

When mixing Self Cure Activator with XP Bond or Prime&Bond NT, the simplest dual cure, self priming adhesive system is achieved with only two bottles. Self Cure Activator is suitable for bonding all indirect restorations, including metal, porcelain and composite crowns, inlays, onlays, veneers, bridge retainers and endodontic posts.

Self Cure Activator
• 1 x Bottle, 4.5ml

634354

Restorative

Composite Materials

Product Code

SDR™ – Smart Dentine Replacement

SDR is a self-leveling, flowable composite that requires no instrumentation (even in maxillary cases) and provides excellent cavity adaption. SDR has low Polymerisation Stress (shrinkage stress) allowing for filling up to 4mm in one cure, to then be overlaid with a methacrylate based universal, posterior composite for replacing missing occlusal or facial enamel.

SDR Compute Refill 60603002
 • 15 x SDR computes

SDR Eco Refill 60603003
 Includes:
 • 50 x SDR computes
 • 1 x Storage box

SDR Syringe Refill 60603005
 Includes:
 • 3 x 1g SDR syringes

SDR Syringe Eco Refill 60603011
 Includes:
 • 10 x 1g SDR syringes

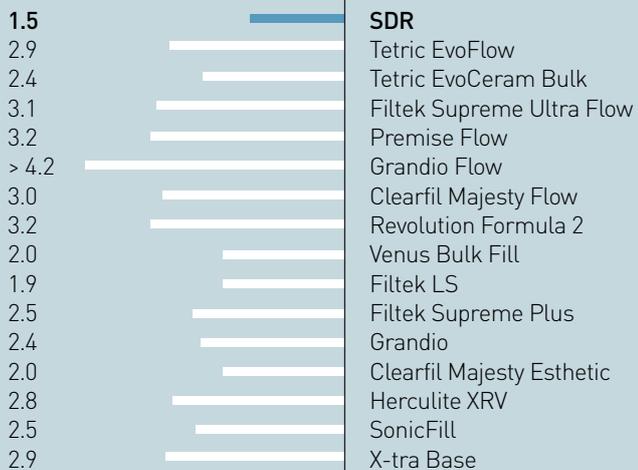

Accessories

Compute Tip Gun 635105
 For easy handling of compute tips, i.e. direct and precise placement of the composite and compomer restorative into the cavity. Fully autoclavable.

SDR Syringe Applicator Needles 60603007
 • 60 x Applicator Needles

Shrinkage Stress (MPa)

Shrinkage Stress: Polymerisation shrinkage stress is statistically lower for SDR material meaning less stress is transmitted to the tooth when compared to conventional composites and flowable composites.*

TPH³ Micro Matrix Restorative - Universal Restorative

TPH³ restorative blends nanofiller technology with proprietary synergistic fillers in a patented, clinically proven, tri-model blend resin matrix that delivers both aesthetics and durability. TPH³ offers optimal balance between filler and resin matrix which helps provide creamy, non stick and sculptable handling. A simple-to-use 26 shade system allows for universal restoration with natural results whilst its fluorescence mimics the natural appearance of human dentition.

TPH³ Computes[®] Tips Intro System

Matrix Systems

Product Code

Triodent™ V4 ClearMetal Matrix™ System

V4 is the matrix system for all class II restorations, combining to create natural anatomical contours and predictable, tight contacts. V4's transparent components make it a great match for deep cavities and for resins that can be placed in large increments (such as SDR™).

V4 gives clinicians peace of mind that the composite is sufficiently cured before the matrix is removed.

V4 Ring Starter Pack

403338

Includes:

- 1 x V4 Molar Ring (Blue)
- 1 x V4 Pre Molar Ring (Silver)
- 25 x ClearMetal Matrices 4.5mm
- 50 x ClearMetal Matrices 5.5mm
- 25 x ClearMetal Matrices 6.5mm
- 25 x V4 Wedge Small (Clear)
- 25 x V4 Wedge Medium (Pink)
- 25 x V4 Wedge Large (Purple)
- 25 x V4 Wedge Extra Large (Grey)
- 2 x Pin-Tweezers
- 1x Forceps

V4 Ring Upgrade Pack

403339

For existing Triodent users who already have Triodent Pin-Tweezers and Forceps. Includes:

- 1 x V4 Molar Ring (Blue)
- 1 x V4 Pre Molar Ring (Silver)
- 25 x ClearMetal Matrices 4.5mm
- 50 x ClearMetal Matrices 5.5mm
- 25 x ClearMetal Matrices 6.5mm
- 25 x V4 Wedge Small (Clear)
- 25 x V4 Wedge Medium (Pink)
- 25 x V4 Wedge Large (Purple)
- 25 x V4 Wedge Extra Large (Grey)

Matrix Systems

V4 Ring™

The V4 Ring has a newly adapted design to facilitate better grip over the full range of Class II cavity shapes. The ring is constructed from NiTi with transparent tines for light transmission and has no embossed surface to decrease the adhesion of bonding agents and composites.

Product Code

V4 Ring Molar (Blue) 2 pack 403332

V4 Ring Pre Molar (Silver) 2 pack 403333

V4 Ring Mixed 2 Pack 403334

Includes:

- 1 x Molar Ring
- 1 x Pre-Molar Ring

V4 ClearMetal Matrix™

Hundreds of microscopic resin-filled 'micro-windows' allow light to pass through the matrices, so the restoration can be cured laterally and interproximally, as well as occlusally. The only transparent matrix with the advantages of both metal malleability and a non-stick coating.

V4 ClearMetal Matrix 50 Pack

Triodent™ V3 Sectional Matrix System

The V3 System is an integrated and innovative sectional matrix system with Nickel Titanium rings, anatomically shaped matrix bands and adaptive, self-guiding wedges providing:

- Predictable, tight contacts
- Restorations that accurately replicate natural tooth anatomy
- Minimal finishing
- Ideal separating force
- Great results with wide cavities and missing cusps

V3 Ring Starter Pack

403302

Includes:

- 1 x V3 Ring Universal
- 1 x V3 Ring Narrow
- 1 x Forceps
- 2 x Pin-Tweezers
- 75 x Wave-Wedges
- 75 x V3 Tab Matrices

V3 Ring Universal (Green)

- 1 x V3 Ring Universal (Green)
- 1 x V3 Ring Narrow (Yellow)

Triodent SuperCurve Matrices

SuperCurve is an anatomical matrix, contoured for greater stability and coated with a micro-thin, colour-coded, non-stick surface for easier removal.

SuperCurve hugs the tooth thanks to extra curvature on the horizontal plane, is exceptionally stable after placement and easier to remove than standard matrices.

SuperCurve Intro Pack

403402

Includes:

- 10 x 3.5mm
- 25 x 4.5mm
- 25 x 5.5mm
- 25 x 6.5mm

Matrix Systems

V3 Tab Matrices

The pronounced marginal ridge for great anatomy and greater curvature on horizontal plane means more curvature remains as the matrix wraps around the tooth. The gingival apron is properly shaped to commonly encountered cavity form, avoiding gaps in the gingival-axial corner.

V3 Tab Matrix 3.5mm

50 pack	403388
100 pack	403387

V3 Tab Matrix 4.5mm

Wave Wedge Small (White)

100 pack	402066
----------	--------

Triodent™ WedgeGuard

WedgeGuard interproximal tooth shield prevents bur damage to the adjacent tooth while the cavity is being cut. There is no need to slow down when breaking contact, the gingival papillae is protected and the wedge stays behind after the shield is detached, so no reactive hyperemia and no cost of a second wedge. The wedge retains all the qualities of the award-winning Wave-Wedge and is ideal for Class II and III cavities, veneers and crowns, and tunnel preparations.

WedgeGuard Introductory Kit

403386

Includes:

- 25 x each of the WedgeGuard sizes, Small, Medium and Large

WedgeGuard Refills

Each refill includes:

- 50 x WedgeGuards

Enhance® Multi - Multiple use Finishing & Polishing System

Enhance Multi is a two step, multi use finishing and polishing system which is easy to use and offers a significant time saving to your procedures. It is impregnated with a unique quality diamond grit which offers a superior gloss and smoother finish when used in combination with DENTSPLY restorative materials*. The Enhance Multi tips are reusable at least 30 times (wear depends on size of restoration, chosen instrument and application technique), making them more economical and hence excellent value.

Diode Lasers

Product Code

PICASSO

PICASSO Lite

AMD Picasso and Picasso Lite Diode Lasers

AMD Lasers allow for clean cutting and haemostasis in a wide range of soft tissue procedures. As well as cutting and coagulating, they cauterise the nerve endings and decontaminate the surgical site, speeding up patient healing time with minimal post-operative pain. In addition, they can be used to treat periodontal disease and help decontaminate root canals.

Benefits of both the Picasso and the Picasso Lite units:

- Easy to use
- World class education and clinical support tools, with the DENTSPLY iCLE Diode Laser Certification approved by both Queensland Radiation Health and the Western Australian Radiological Council, satisfying the required competencies for licenses in these states.
- Wireless foot control
- The only system to offer both strippable fibre or disposable tip system
- 2 year warranty on both units
- DENTSPLY support & service, including the support of a DENTSPLY Regulatory Liaison Officer to assist with Laser regulatory requirements where licensing is required
