

31.5-inch 4K UHD IPS Surgical Monitor

■ | 32HL714S |

The screen image is simulated for illustrative purposes only

Excellent Picture Quality for Surgical Procedure

31.5-inch 4K UHD (3840 x 2160) IPS Color Display | 178° Wide Viewing Angle

The LG 32HL714S surgical display monitor is well-equipped with a 31.5" IPS color display and 4K UHD (3840 x 2160) resolution to produce vibrant and vivid colors to help surgeons see complex images during the surgical procedure. Plus, this surgical display monitor features a 178° wide viewing angle for surgeons to view the screen from virtually any angle.

The screen image is simulated for illustrative purposes only

HDR10 Support

The LG 32HL714S 4K UHD surgical display monitor supports advanced High Dynamic Range (HDR10) video content, displaying impressive color depth during the surgical procedure.

*12G-SDI Support

The LG 32HL714S is built on the IPS display with an added hardware component of a 12G-SDI input module, in-supporting long distance* transmission of 4K signals over a single coaxial cable with low latency.

**12G-SDI input transmission distance: max. 70m*

Simple Connection to Multi-Input Sources

Up to *4PBP (Picture-by-Picture) | PIP (Picture-in-Picture) Connection Mode

Surgeons can view multiple surgical procedure images simultaneously on one monitor, either side by side using PBP (Picture-by-Picture) or one above the other using the PIP (Picture-in-Picture) mode. This distinctive feature included in the LG 32HL714S surgical display monitor can be helpful in various instances, such as when there is a need to display a patient's vital signs with their surgical images. Moreover, the LG 32HL714S surgical display monitor comes with DisplayPort, DVI, and HDMI input/output sources featuring the *4PBP/PIP functions and the 12G-SDI for 4K video signal transmission.

"4PBP refers to the ability to view up to four pictures on the monitor in side by side mode, as simulated above with the following images, which are for illustrative purposes only."

Optimized for Surgical Suites

Mirror & Rotation Mode

The LG 32HL714S surgical display monitor provides Mirror & Rotation features that help optimize the operating view in the surgical suites. Surgeons can select the 180° rotated images or the mirror image of the surgical procedure.

Failover Input Switch

When the primary image source is missing, the display will automatically switch to a failover (backup) source and restore the main source once the signal is back. Users can set the main input and failover input in the setting menu of the monitor.

The screen image is simulated for illustrative purposes only

SPECIFICATIONS

		32HL714S	
Model	1.1.1 Ekranas IPS technologijos.		
	1.1.4 Ekranas įstrižainė – 31,5 colių.		
Panel	Panel Type	IPS	
	Inch (Aspect Ratio)	■ 31.5-inch (16:9)

1.2.1 Raiška 3840 x 2160 taškų baltos šviesos standartiniame ir ICG fluorescenciniame režimuose;

- **Digital two-chip camera head for 4K UHD white light and near infrared (NIR)/ Indocyanine Green (ICG) fluorescence applications with 2 freely programmable camera head buttons, compatible with systems with integrated, innovative visualization technologies, for shifting the color spectrum and for homogeneous illumination and contrast enhancement.**

Specifications:

Image sensor: 2 x 1/2.5" CMOS chip.

- Pixels: 3840 (H) x 2160 (V) pixels.

CMOS chip supports 16:9 input format.

Progressive scan (full frame) for display of 50 or 60 full frames per second.

Lens: Integrated lens, f = 19 mm.

Camera head buttons: 3 (2 of them freely programmable).

Dimensions (h x w x d): 55 mm x 41 mm x 150 mm.

Weight: 260 g.

Integrated camera cable (3 m) with special plug for CCU.

CF with defibrillation rating acc. to EN 60601 allows the use of camera for thoracic and heart surgery (in combination with the camera control unit).

The camera head is suitable for the following sterilization methods:

- Sterrad® 100S, NX 100NX
- Steris® System1, V-Pro1
- ETO gas sterilization
- FO sterilization (H₂O₂)
- CIDEX, Reset XL HLD

Fixed camera cable (3 m).

Special Features:

Camera head for fluorescence imaging, suitable for white light endoscopy and NIR/ICG fluorescence applications.

- Various display options for NIR/ICG fluorescence applications:

- Overlay: ←
White light image with superimposed display of NIR/ICG fluorescence.
 - Possible to select the preferred color for NIR/ICG imaging:
Either blue or green.
- Monochromatic: ←
NIR/ICG fluorescence signal in white. Background in black for maximum contrast.
- Intensity Map:
White light image with superimposed display of NIR/ICG fluorescence. NIR/ICG signal display will appear in different colors depending on the strength of the detected NIR signal.

1.3.7 ICG fluorescenciniai režimai:
Kombinuotas baltos šviesos ir ICG fluorescencinis vaizdavimas vienu metu su galimybe pasirinkti ICG spalvą (angl. overlay);

1.3.7.2 Monochromatinis NIR/ICG vaizdavimas.

Image display in 16:9 format with 3840 x 2160 pixels and progressive scan.

Programmable image refresh rate 50 or 60 Hz.

Digital through and through: This system allows the optical image to be converted into a digital image at the earliest possible stage: Directly in the CMOS sensor chip.

The 16:9 CMOS chip in the camera head allows image capture and image display on widescreen monitors without the need for conversion. Software scaling of the image leading to deterioration of the image is thus avoided.

With an input resolution of 8 million pixels, the camera yields a resolution that is 4 times higher than FULL HD.

3x digital zoom.

1.3.3 Skaitmeninis didinimas – 3 karto

Ergonomic design – compact, lightweight design that fits comfortably in the hand.

2 freely programmable camera head buttons.

Compatible with systems with integrated, innovative visualization technologies, for shifting the color spectrum and for homogeneous illumination and contrast enhancement.

Kokybės kriterijus nr. 5
Skaitmeninis vaizdo didinimas 3 kartai

1.2.3 Galimybė kameros
mygtukų pagalba valdyti šviesos
šaltinį;

- Suitable light sources can be controlled by the camera head buttons by means of a communication protocol.
Suitable insufflators can be controlled by the camera head buttons by means of a communication protocol.
In combination with this camera head, suitable camera control units can output 4K UHD images as well as FULL HD videos to a USB storage medium.
In combination with this camera head, suitable camera control units can output images to a suitable video printer.

Consisting of:

Digital two-chip 4K UHD camera head with integrated camera cable (3 m).

7.1 Neutral datasheets

- **TC304: IMAGE1 S™ 4U-Link**
Digital camera module for operating UHD 4K camera heads.

Technical data:

Camera input: 1 x UHD 4K camera head
Maximum resolution: 3840 x 2160 pixels
Output: DisplayPort
Automatic shutter
Automatic Gain Control: Microprocessor-controlled
Connection: Module connecting cable to the video processor module
Dimensions (w x h x d): 305 mm x 54 mm x 320 mm
Weight: Less than 2.5 kg
Operating voltage: 100-120 VAC, 50/60 Hz, 200-240 VAC, 50/60 Hz.
Power consumption: 100 VA
Type: IEC 601-1, 601-2-18, CSA 22.2 No. 601, UL2601-1 and CE according to MDD, safety rating 1/CF defib.

1.3.1 Maksimali raiška –
3840 x 2160 taškų;

Special features:

- Modular design: Operation requires the combination with a video processor module and a compatible camera head.
- When connecting selected camera heads, the following modes can be activated without special light sources or filter systems:
 - Color inversion by shifting the color spectrum
 - Brightening of dark areas in the endoscopic image
 - Contrast enhancement
- Resolution of 3840 x 2160 pixels
- Progressive scan for an extremely steady image without flickering and noise.
- With compatible camera heads, two freely programmable camera head buttons with up to 4 assignable functions, implemented in combination with the IMAGE1 S CONNECT™ module.
- **Change of visualization modes**, device control, digital zoom, brightness, video capture, still image capture, printing orders, picture-in-picture mode, image alignment, white balance, and setup can be controlled from the sterile area **through camera head buttons**, implemented in combination with the IMAGE1 S CONNECT™ module.
- Integrated digital image processing module for brightness adjustment in 5 levels and with 2 electronic anti-Moiré filters for fiberscopes.

TO WHOM IT MAY CONCERN

Your ref.	Date of your letter	Our ref. Exp.E / KB	Date 06.11.2018
-----------	---------------------	------------------------	--------------------

Dear Sirs,

Herewith, KARL STORZ SE & Co. KG., Dr. Karl-Storz-Str. 34, D-78532 Tuttlingen (Germany)

DECLARES

1.3.5 Su integruotu moduliu nuotraukų ir video vaizdų įrašymui į USB tipo laikmenas

that our listed products are fully responding technical characteristics as follows:

TC201EN

Digital 4K UHD video processor module with integrated documentation function for image and video capturing for use with camera heads and 2D and 3D video endoscopes in combination with compatible camera modules. Modular expendable to future technologies.

Technical data:

Connections:

- 2 x Display Port 1.2 output
- 1 x 12/3G-SDI output
- 1 x DVI output
- 3 x camera input for communication with compatible camera modules
- LAN connection
- 4 x USB connection (2 x front, 2 x back)

1.3.4 Signalų išvestys: 12G-SDI.

Max. resolution: 3840 x 2160 pixels.
Color space: BT.2020 and BT.709.
Dimensions (wxhxd): 30.5 cm x 5.4 cm x 32.0 cm.
Weight: < 4 kg.
Power supply: 100-240 VAC, 50/60Hz.

Power consumption: < 180VA.

Certified to: IEC601-1, 601-2-18, CSA 22.2 No. 601, UL2601-1 and CE acc. to MDD, protection class 1.

Optional: USB to ACC adapter for device control.

Special features:

Modular design: For use in combination with at least one camera module.

Modular design: Just in time acquisition based on demand.

Modular design: Expandable to future technologies.

Modular design: Replacement of components instead of complete replacement.

Three different menu structures for optimized settings for service OR personnel and the surgeon.

3D, 2D rigid/flexible, Molecular Imaging representable via one system, dependent on additionally used modules.

Regular software updates for enhanced functionality.

Parallel live display of visualization modes besides white light mode (picture-in-picture).

Up to three different camera modules can be connected to the video processor module.

Integrated picture-in-picture mode of two different camera modules in five different display sizes available.

Primary and secondary signal source change in picture-in-picture mode can be performed easily via camera head buttons.

Integrated communication bus for device control and information display of connected devices.

Resolution of 3840 x 2160 pixels.

→ Integrated documentation unit via USB.

■ Video capturing in FULL HD quality (MPEG4 format).

■ Still image capturing in 4K UHD quality (JPEG format).

Still image (4K UHD quality) and video capturing (FULL HD quality) in picture-in-picture mode for both signal sources simultaneously.

Medical USB printer compatible (plug & play).

Data capturing functions can be released by optional USB footswitch.

Automatic adjustment of light intensity of light source via communication bus.

White balance button on front plate of video processor module.

Control of complete camera system can be realized from camera head from sterile area.

Short learning curve due to familiar handling, which reduces starting time and parameter adjustment.

Grid and pointer can be displayed for improved orientation and communication during surgery.

Grid and pointer can be displayed individually and together in the center of the image.

Possibility of 180° image rotation.

Possibility of vertical and horizontal image mirroring.

Storage of up to 20 individual presets.

Storage of up to 50 individual patient data.

Temporary display of connected video-endoscope and camera head data on the screen.

Display of date and time on the monitor.

Display of brightness and of light source intensity for compatible light sources on the monitor.

System overview is individually configurable and setup status can be directly displayed with intelligent icons.

Number of menu icons can be customized individually for optimal system adjustment for the user.

Modular design for integration of up to 3 camera modules and easy upgradeability with new technologies.

Future ready thanks to integrated and extendable architecture.

1.3.5 Su integruotu moduliu nuotraukų ir video vaizdų įrašymui į USB tipo laikmenas

1.3.5.1 Video vaizdų įrašymas Full HD formatu, įrašomų nuotraukų kokybė atitinkanti 4K standartą

1.3.2.2 Suderinama su:
4K (3840 x 2160 taškų) standarto
ICG kamerų galvutėmis

- TC201EN* **IMAGE1 S CONNECT® II**, connect module, for use with up to 3 link modules, resolution 3840 x 2160 and 1920 x 1080 pixels, with integrated KARL STORZ-SCB or KS HIVE and digital Image Processing Module, power supply 100-240 VAC, 50/60 Hz
- TC304 **IMAGE1 S™ 4U-LINK**, link module, for use with IMAGE1 S™ 4U camera heads, power supply 100-240 VAC, 50/60 Hz, for use with IMAGE1 S CONNECT® TC200 or IMAGE1 S CONNECT® II TC 201
- TH121** **IMAGE1 S™ 4U RUBINA™**, OPAL1® NIR/ICG, two-chip 4K UHD camera head, S-Technologies available, for NIR/ICG fluorescence imaging in combination with POWER LED RUBINA™, OPAL1® NIR/ICG, progressive scan, low-temperature sterilization, focal length f = 19 mm, 2 freely programmable camera head buttons, for use with IMAGE1 S CONNECT® II and IMAGE1 S™ 4U-LINK ■
- TH120 **IMAGE1 S™ 4U One-Chip 4K UHD Camera Head**, S-Technologies available, progressive scan, soakable, EO sterilization, H₂O₂ (hydrogen peroxide), focal length f = 18 mm, 2 freely programmable camera head buttons, for use with IMAGE1 S™ 4U-LINK ■
- TM440 **58" 4K Monitor**, screen resolution 3840 x 2160, image format 16:9, power supply 100-240 VAC, 50/60 Hz, wall mount with VESA 400 x 400 and VESA 400 x 400 adaptors
- TM 343 **32" 4K Monitor**, screen resolution 3840 x 2160, image format 16:9, power supply 100-240 VAC, 50/60 Hz, wall mount with VESA 100 and VESA 200 adaptors
- TM450 **55" 4K/3D Monitor**, screen resolution 3840 x 2160, image format 16:9, power supply 100-240 VAC, 50/60 Hz, 100-240 VAC, 50/60 Hz, wall mount with VESA 200 and VESA 300 adaptors
- TM009 **Signal Converter Set**, 12G-SDI – 4x 3G-SDI, for use with 55" 4K/3D Monitor TM450
- TM350 **32" 4K/3D Monitor**, screen resolution 3840 x 2160, image format 16:9, power supply 100-240 VAC, 50/60 Hz, wall mount with VESA 100 adaptor
- TL400 **Cold Light Fountain POWER LED RUBINA™**, for NIR/ICG fluorescence imaging and standard endoscopic diagnosis, with two LEDs and one KARL STORZ light cable connection, with integrated unit communication via KS HIVE, power supply 100-125/220-240 VAC, 50/60 Hz
- TL300 **Cold Light Fountain POWER LED 300 SCB**, with integrated KARL STORZ-SCB, high-performance LED module and one KARL STORZ light outlet, power supply 100-240 VAC, 50/60 Hz
- 495NAC **Fiber Optic Light Cable**, with straight connector, extremely heat-resistant, with safety lock, enhanced light transmission, diameter 3.5 mm, length 230 cm
- 495NCSC **Same**, diameter 4.8 mm, length 250 cm
- 495TIP **Same**, diameter 4.8 mm, length 300 cm

1.3.2.1 Suderinama su:
4K (3840 x 2160 taškų)
standarto kamerų galvutėmis.

* Also available in the following languages: DE, ES, FR, IT, PT, RU

** For use with HOPKINS® RUBINA™ NIR/ICG telescopes

1.4.1 LED tipo šviesos šaltinis

TL400 LED white light/fluorescence cold light source with one light connection for use with suitable endoscopes, with two separately or simultaneously active high-performance

LEDs for white light and near infra applications with high light intensity and minimal energy consumption and suitable for white light as well as fluorescence applications in near infrared (e.g. ICG).

1.4.2 Pritaikytas standartinei baltos šviesos ir ICG fluorescencinei diagnostikai

Specifications:

Lamp type: Two high-performance LEDs, white light LED and near infrared LED, which are active individually or simultaneously.

Color temperature: White light 5700 K.

Color rendering index (CRI): 65.

Number of light outlets: 1.

Light intensity adjustment: Continuously manual or via communication channel.

Power supply: 100-240 VAC.

Frequency: 50-60 Hz.

Power consumption 220 VA.

Dimensions (w x h x d): 305 x 120 x 370 mm.

Weight: 7.4 kg.

Light color: Pure white and near infrared.

Certified to: IEC 60601-1, IEC 60601-2-18, CE acc. to MDD, protection class I/safety class for protection against electric shock, CF at least; with KS light cables, CF defib.

1.4.4 Reguliuojamas šviesos intensyvumas

1.4.3 NIR/ICG lempos darbo resursas 30000 valandų

Special Features:

Extremely long average LED lamp life of 30,000 hours.

Natural color rendition.

Very high energy efficiency with the latest LED technology.

Light adaptor with anti-glare shield.

Standby button with memory function (remembers last brightness level selected).

Light intensity can be manually fine-tuned in 20 steps.

Light intensity can be fine-tuned in 99 steps via communication channel.

Manual control from the sterile field using camera head buttons via a communication channel in combination with compatible camera system.

Integrated color touch screen for straightforward and intuitive control via light source functions.

Communication interface on the light source for connection to other units.

Extremely quiet operation.

Very environmentally friendly as LEDs are free of lead and mercury. RoHS 2 compliant.

LED technology for extremely high light output.

Light output comparable with XENON 300 W light sources.

Very low decrease in light output throughout the LED lamp life (white light and NIR LEDs).

Protection class CF defib for KARL STORZ light cables (protection class CF when using light cables from other manufacturers).

No use of laser light, thus eliminating the need for laser safety measures.

Consisting of:

LED white light/fluorescence light source.

Mains cord.

Communication Interface connecting cable.

NIR/ICG demonstration card.

ENDOFLATOR® 50 SCB ^{NEW}

with Speed-Flow Insufflation (50 l/min),
Recommended Standard Set Configuration

INSUFFLATORS AND SMOKE GAS SUCTION CONTROL

Special Features:

- Ease of use due to large, color 7" touch screen
- Simultaneous display of set values and actual values facilitate monitoring of the insufflation process
- Automatic adjustment of insufflation rate to diverse instrument resistance values ensures the fastest possible insufflation
- Fully automatic, electronically controlled gas refill (e.g. in case of gas loss when changing instruments)
- **SECUVENT® Safety System: Constant monitoring of intraabdominal pressure**
- Especially suitable for providing a high gas flow when using smoke generating techniques
- Powerful high-flow mode for fast insufflation of large gas volumes up to 50 l/min
- A high-capability trocar (**HICAP®**) that allows ideal flow conditions is included in the set
- Tubing set with integrated heating element for preheating gas to body temperature to prevent peritoneum from cooling down
- With connection possibilities to the **KARL STORZ Communication Bus (KARL STORZ-SCB)** for unit integration

UI 500 S1 **ENDOFLATOR® 50 SCB**, with integrated SCB module, power supply 100 – 240 VAC, 50/60 Hz including:
SCB Connecting Cable, length 100 cm
Universal Wrench
Heated Insufflation Tubing Set*, with gas filter, sterile,  for single use, package of 3
HICAP® Trocar, size 11 mm

Specifications:

Operating mode	- High-flow mode - Sensitive mode
Gas flow	- Sensitive mode: 0.1-15 l/min - High-flow mode: 1-50 l/min
Pressure	- Sensitive mode: 1-15 mmHg - High-flow mode: 1-30 mmHg
Gas	CO ₂
Measuring/control system	Electronic
Parameter display	- Set pressure - Actual pressure (intraabdominal) - Gas flow - Gas consumption: 0-999 l - Status display gas consumption

SECUVENT® safety system	●
Gas heating	●
Power supply	100-240 VAC, 50/60 Hz
Dimensions w x h x d	305 x 164 x 315 mm
Weight	7.8 kg
Certified to	IEC 601-1, CE acc. to MDD

1.5.1 Maksimalus dujų padavimo greitis 50 l/min.

1.5.3 Su integruotu modulių dujų pašildymui

1.5.2 Maksimalus pasiekiamas slėgis 30 mmHg

Optional Accessories for ENDOFLATOR® 50 SCB see pages U 10-11

Components/Spare Parts see chapter 21

PRODUCT LAUNCH

3.6 Insufflation

Once insufflation has started, the actual pressure and flow values are indicated by a white bar. The numerical values appear on the left side of the bar. The light-blue line denotes the target values. The indicator in the lower left-hand corner shows the total consumption of CO₂ and can be reset if necessary.

1.5.6.1 Sterilizuojami žarnelių rinkiniai insufliacijai

<p>Patient Tube</p> 	<p>UI004</p>	<p>Insufflation Tube, sterilizable, inner diameter 9 mm, length 250 cm, for use with ENDOFLATOR® 40 UI400 or ENDOFLATOR® 50 UI500</p>

ENDOMAT® SELECT ^{NEW}

Roller pump for the irrigation of fluids

1.6.1.2/1.6.2.2 Skirtas irigacijai

STORZ
KARL STORZ — ENDOSKOPE

1.6.1.1/1.6.2.1
Ratukinio tipo;

Special Features:

- Roller pump system for pressure-controlled irrigation
- Max. pressure setting: 150 mmHg
- Interface and communication with UNIDRIVE® S III ARTHRO SCB supports reliable joint distension
- Unit and accessories extremely easy to use
- Multidisciplinary use
- With connection option for KARL STORZ Communication Bus (KARL STORZ-SCB)
- Boost mode: For stabilization of the cavity when shaver is activated or for hemostasis by activating an additional one-pedal footswitch

2 Normal use

2.1 Intended purpose

Suction and irrigation pumps

Suction/irrigation pumps are used for the introduction of irrigation fluids into organs, joints, and operating fields as well as the suctioning of irrigation fluids and bodily fluids, secretions, tissue, and gases. Suction/irrigation pumps do not come into contact with the body.

Control cable

The connecting cables are used for electrical signal transmission. Connecting cables do not come into contact with the body.

2.2 Indications

Suction and irrigation pumps

The product provides irrigation or suction functions for the following disciplines:

- Urology
- Gynecology
- Surgery (thoracoscopy, laparoscopy, and proctology)
- Arthroscopy
- Spinal surgery

In addition, the pump with suction or irrigation function can be used for cleaning lenses.

For the product specifications, see the see chapter *Technical data* [p. 21].

Control cable

The connecting cable is used for electrical signal transmission. It does not depend on special indications.

2.3 Contraindications

Suction and irrigation pumps

The medical devices must not be used for procedures in direct contact with the central nervous system (CNS) and central cardiovascular system. The accessories must only be used with the intended devices. In general, medical devices must not be used on patients who are not part of the defined patient group, or if the operation itself is contraindicated. The use of pump systems is contraindicated if, in the opinion of the attending physician, the surgical method as such is contraindicated, or if the patient is not able to undergo surgery or anesthesia due to his or her general condition.

Use is contraindicated if, in the opinion of the attending physician, the device is not compatible with successful completion of the planned procedure due to its technical design.

The ENDOMAT SELECT must not be used for:

- ERCP
- Cholangioscopy (gastro)
- Spine lumbar (interlaminar access)
- Spine cervical
- Applications that require a non-pulsatile flow

1.6.2.2 Skirtas siurbimui ir irigacijai (nurodytos funkcijos neprivalo veikti vienu metu);

2.6 Intended application areas on the patient

1.6.2 Plovimo įrenginys laparoskopijai

1.6.1 Plovimo įrenginys histeroskopijai

The product can be used on patients in the following areas:

Discipline	Application area
SURG	Abdomen, thorax, procto
GYN	Uterus
URO	Lower and upper urinary tract
ART	Joints in the foot, knee, hip, shoulder, hand or finger
SPINE	Thoracic and lumbar vertebral column
ENT/NEURO	Cleaning endoscope lenses
GI	Upper and lower gastrointestinal tract

2.7 Intended conditions of use

The product may only be used in hospitals and doctors' offices in suitable ambient conditions.

Condition	Operation
Frequency of use	One or more times a day
Length of use	Several minutes to several hours a day
Place of installation	Positioning on a level, vibration-free surface
Mobility	Can be moved if placed on a cart.
Combination	Can be used on the patient at the same time as other devices.
Control	Can be controlled via the KARL STORZ HIVE.

1.6.1 Plovimo įrenginys
histeroskopijai (programinė įranga
histeroskopijai)

1.6.2 Plovimo įrenginys
laparoskopijai
(programinė įranga
laparoskopijai)

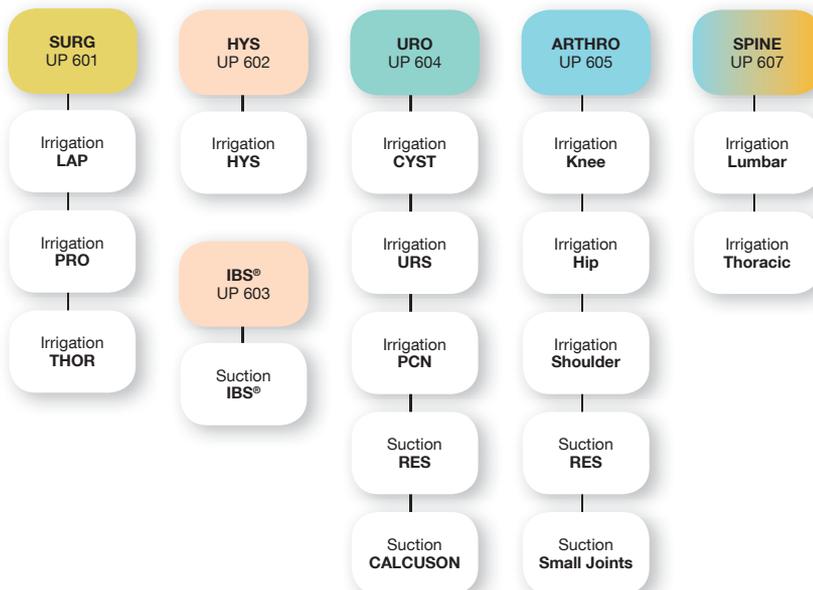

The following software modules are currently available for use with ENDOMAT® SELECT*

- UP 601 **Surgery, Software, License**, allows selection of the procedures “LAP”, “THOR” and “PROCTO”, for use with ENDOMAT® SELECT UP 220
- UP 602 **Hysteroscopy, Software, License**, allows selection of the procedure “HYS”, for use with ENDOMAT® SELECT UP 220
- UP 603 **IBS® Shaver, Software, License**, allows selection of the procedure “IBS® Shaver”, for use with ENDOMAT® SELECT UP 220
- UP 604 **Urology, Software, License**, allows selection of the procedures “CYST”, “RES”, “URS”, “CALCUSON” and “PCN”, for use with ENDOMAT® SELECT UP 220
- UP 605 **Arthroscopy, Software, License**, allows selection of the procedures “KNEE”, “HIP”, “SHOULDER” and “Small Joints”, for use with ENDOMAT® SELECT UP 220
- UP 607 **Spine, Software, License**, allows selection of the procedures “Lumbar” and “Thoracic”, for use with ENDOMAT® SELECT UP 220

*Please note that at least one software package must be ordered to ensure a fully functional unit.

4 Product description

4.1 Description of operation

The ENDOMAT SELECT is a roller pump that can be used for irrigation and suction of fluids during operations in various disciplines of human and veterinary medicine. It is not possible to combine disciplines of human and veterinary medicine.

The device automatically adapts to suit the type of operation being performed by providing the optimum operating parameters when a tubing set for a specific discipline is attached, provided the product is enabled for the area of application. The product can be configured in such a way that only the areas of application that the user wants to use are displayed. Further disciplines can be retrofitted, and extended setting options are available with the Advanced software package.

1.6.1.3 Valdymas
lietimui jautriu ekranu

In urological and arthroscopic applications, the irrigation pressure can also be increased briefly with a BOOST function. In other applications, either the irrigation flow or the irrigation pressure can be limited.

The product is operated and controlled via a touch screen. The current operating state can be checked by displaying the set and actual values of the irrigation pressure or flow. If the set value deviates continuously, an electronic safety circuit blocks the delivery or suction, and acoustic signals sound. An electronic auto-check system tests the various system components when the product is started and notifies the operator of any failures detected.

- ① The range of functions of the product varies according to the installed software package. For the required accessories for the respective software package, see see chapter *Accessories and spare parts* [p. 66].

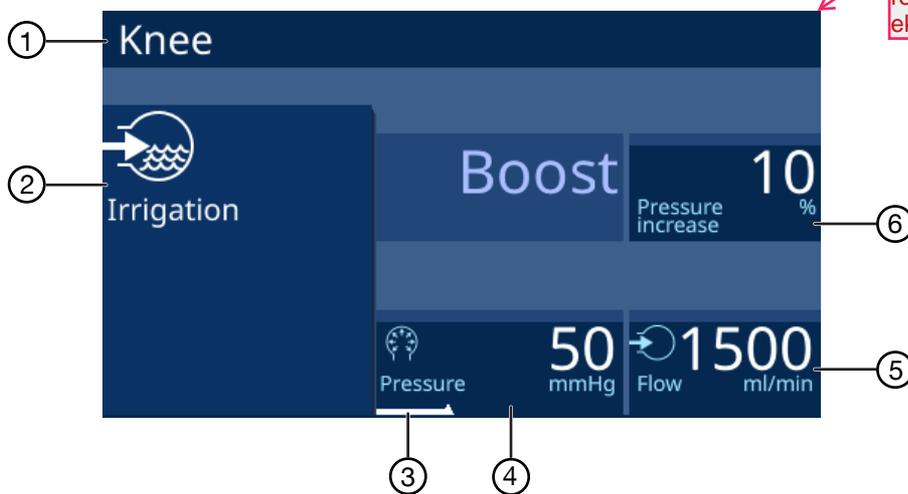

4.2 Product overview

ENDOMAT SELECT – Front view

- | | |

4.3 Touchscreen

1.6.1.4 Skaitinis darbinių parametų reikšmių vaizdavimas ekrane

- | | | | |
|---|-------------------------------|---|-------------------------|
| 1 | Discipline name | 4 | Limitation of pressure |
| 2 | Start/stop irrigation/suction | 5 | Limitation of flow |
| 3 | Irrigation/suction display | 6 | Boost pressure increase |

Irrigation or suction display

The irrigation or suction function is activated:

- Actual value: orange-colored line
- Set value: white marking

Limitation of pressure or flow

Whether the flow or pressure can be limited depends on the discipline and the installed Advanced software package.

Boost pressure increase

Boost pressure increase is only available in the disciplines of arthroscopy and urology. The boost pressure increase can be set with the button or footswitch in 10% steps from 10% – 50%.

1.6.1.5/1.6.2.3 Galimybė dirbti su daugkartiniais žarnelių rinkiniais

Reusable Tubing Sets for ENDOMAT® SELECT

Reusable tubing sets for the irrigation or suction of fluids are now available for the multidisciplinary ENDOMAT® SELECT single roller pump.

The following reusable tubing sets are now available for ENDOMAT® SELECT:

- For flow-controlled applications, e.g., in laparoscopy, thoracoscopy and proctology.

UP 007

Tubing Set, irrigation, FC, reusable, sterilizable, for use with ENDOMAT® SELECT SCB UP 220 and HAMOU® ENDOMAT® SCB 263311 20-1

1.6.3.1 Daugkartinių žarnelių rinkinys laparoskopijai

- For pressure-controlled applications, e.g., in hysteroscopy, cystoscopy or interventions in arthroscopy and spine surgery

UP 008

Tubing Set, irrigation, PC, reusable, sterilizable, for use with ENDOMAT® SELECT SCB UP 220 and HAMOU® ENDOMAT® SCB 263311 20-1

1.6.3.2 Daugkartinių žarnelių rinkinys histeroskopijai

- For use in hysteroscopic tissue ablation with the IBS® shaver system or for the removal of tissue chips during resection (TUR-B/P)

UP 009

Tubing Set, suction, DS, reusable, sterilizable, for use with ENDOMAT® SELECT SCB UP 220

The following tubing sets can be used with the system:

For pressure-controlled applications, for example, in hysteroscopy, cystoscopy or interventions in arthroscopy and spine surgery.

031523-10 **Tubing Set, Irrigation**, pressure-controlled, for single use, sterile, package of 10, for use with KARL STORZ HAMOU® ENDOMAT® 263311 20 and ENDOMAT® SELECT UP 220

For flow-controlled applications, for example, in laparoscopy, thoracoscopy and proctology.

031524-10 **Tubing Set, Irrigation**, flow-controlled, for single use, sterile, package of 10, for use with KARL STORZ HAMOU® ENDOMAT® 263311 20 and ENDOMAT® SELECT UP 220

For use during the hysteroscopic removal of tissue with the IBS® shaver system or removal of tissue chips during resection (TUR-B/P)

030647-10 **Tubing Set, Suction**, direct suction, for single use, sterile, package of 10, for use with KARL STORZ ENDOMAT® SELECT

For use in combination with the CALCUSON lithotripsy unit in urology

031647-10 **Tubing Set, Suction**, bottle suction, for single use, sterile, package of 10, for use with KARL STORZ ENDOMAT® SELECT

For the ordering process, please use Configuration Flyer 96311002.

Further information is available in the Product Highlight ENDOMAT® SELECT 96311003.

Availability

The ENDOMAT® SELECT unit as well as the above-mentioned software modules and corresponding single-use tubing sets are now in stock.

More software packages will be available in the near future for utilization of ENDOMAT® SELECT during GI, ENT and NEURO surgeries and for further features regarding the general unit settings as well as the enhancement of certain software modules.

Plastic Container for Sterilization, suitable for steam, gas, and hydrogen peroxide (Sterrad®) sterilization and storage, perforated, with lid, for use with two rigid endoscopes up to max. 20 cm working length, external dimensions (w x d x h): 321 x 90 x 45 mm

39301 BS

Plastic Container for Sterilization, especially suited for hydrogen peroxide (Sterrad®) sterilization and storage, perforated, with lid, for use with two rigid endoscopes up to max. 32 cm working length, external dimensions (w x d x h): 446 x 90 x 45 mm

39301 CS

Plastic Container for Sterilization, suitable for steam, gas, and hydrogen peroxide (Sterrad®) sterilization and storage, perforated, with lid, for use with two rigid endoscopes with a working length of over 34 cm, external dimensions (w x d x h): 520 x 90 x 45 mm

39301 D

Plastic Container for Sterilization and Storage of Endoscopes, perforated, with transparent lid, with silicone telescope holder, external dimensions: (w x d x h): 670 x 116 x 80 mm

Please note: The instruments displayed are not included in the plastic containers. **Components and Spare Parts** see pages 57 ff.

KARL STORZ HOPKINS® Telescopes: Quality – Value Preservation – Reliability

The KARL STORZ HOPKINS® rod lens system maintains its impressive image quality with each new telescope. With more than 75 years of experience, the name KARL STORZ stands for high quality standards.

The innovative technologies from KARL STORZ

- Quality improvements of the KARL STORZ telescopes through the continuous optimization of manufacturing processes and the use of high-quality materials
- Fine adjustment of the optical system with state-of-the-art manufacturing technologies
- Detailed and precise reproduction of tissue structures thanks to the harmonization of KARL STORZ telescopes, light sources and the IMAGE1 S™ camera platform.

1.7.4 Pritaikyta darbui fluorescenciniu ICG režimu, pilnai suderinama su siūloma kameros galva (1.2 poz.)

Conventional KARL STORZ HOPKINS® telescopes can be used with all camera platforms, whether HD, 4K or future developments. With KARL STORZ telescopes, you are – according to our philosophy “the future has tradition, and tradition has a future” – ready for the next step.

1.8.2/1.9.2 4K raiška (suderinama su 4K raiškos kameromis)

Quality and service pay off:

The KARL STORZ repair-exchange program creates a closed service cycle: Replacement with original products from KARL STORZ ensures the long-term value preservation of your investments at repair prices. We will be happy to generate a specific cost calculation for you. In the long term, costs are reduced and product life is maximized in accordance with the total cost of ownership model.

Conversion of Sealing Caps

It has been observed on the market that the durability of the colored friction-optimized sealing caps for all existing trocars (with automatic valves, multi-functional valves and silicone leaflet valves), reduction sleeves and reducers does not adequately meet requirements.

With this product information sheet we would like to inform you that we are switching back to the former, white sealing caps.

Replacement:

For all existing trocars (with automatic valves, multifunctional valves and silicone leaflet valves), reduction sleeves and reducers in the field of laparoscopy, the colored friction-reduced sealing caps will be replaced with white sealing caps. The changeover will take place with immediate effect. Sealing caps already delivered need not be returned.

Colored Sealing Cap with reduced friction		White Sealing Cap		Application
	11603-X2 Sealing Cap , for instruments size 2 mm, package of 10, color code: blue		6127290-10 Sealing Cap , (50/2.2), package of 10	For use with trocars size 2.5 mm

Suction and Irrigation Tubes

2.15
 Skirta siurbimui ir irigacijai
 Darbinės dalies skersmuo 5 mm
 Kaniulės ilgis 36 cm
 Su dvipusiu vožtuvu
 Su lateralinėmis skylėmis

■ **Size 5 mm**

Operating instruments, **lengths 30 and 36 cm**,
 for use **with trocars size 6 mm**

Operating instruments, **length 43 cm**,
 for use with telescopes with inbuilt
 working channel **and 6 mm trocars**

Length	Instrument	
30 cm		
■ 36 cm		
43 cm		
Distal End	Instrument	
	26172 BN	■ Suction and Irrigation Tube , anti-reflex surface, with lateral holes, with two-way stopcock for single- hand control
	26173 BN	
	26174 BN	
	26173 BL	Suction and Irrigation Tube , anti-reflex surface, with two-way stopcock for single-hand control, with two female LUER-lock connectors
	26173 BK	Suction and Irrigation Tube , anti-reflex surface, with protective basket, with two-way stopcock for single- hand control

Size 10 mm

Operating instruments, **length 36 cm**,
 for use **with trocars size 11 mm**

Length	Instrument	
36 cm		
Distal End	Instrument	
	37560 LH	Suction and Irrigation Tube , with lateral holes

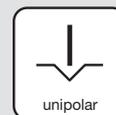

Please note:
Handles for use with Suction and Irrigation Tubes see pages 225-226
Units for use with Handles for Suction and Irrigation see chapter 17, UNITS
Components/Spare Parts see chapter 18

Coagulation and Dissection Electrodes

without suction channel, insulated sheath,

- with connector pin for unipolar coagulation

2.16
Skirtas koaguliacijai ir disekcijai
L formos
Su jungtimi monopolinei
koaguliacijai
Skersmuo 5 mm;
Darbinės dalies ilgis 36 cm.

Size 5 mm

Operating instruments, lengths 30 and 36 cm, for use with trocars size 6 mm

Operating instruments, length 43 cm, for use with telescopes with inbuilt working channel and trocars size 6 mm

Length	Instrument
30 cm	
36 cm	
43 cm	

Distal Tip	Instrument
	26772 UF 26775 UF 26778 UF Coagulation and Dissection Electrode, L-shaped
	26775 UE 26778 UE Coagulation and Dissection Electrode, spatula-shaped, blunt
	26775 S Coagulation and Dissection Electrode, knife-shaped
	26775 R MANGESHIKAR Coagulation Electrode, with ball end

Special Features:

- The hook electrode is suitable for resection, insulating structures as well as dissection and coagulation.
- The distal tip is semicircular: The thick outer curvature enables dissection.

Length	Instrument
36 cm	
43 cm	

Distal Tip	Instrument
	26775 C 26775 CL CADIERE Coagulation and Dissection Electrode, L-shaped, with cm-marking, distal tip tapered

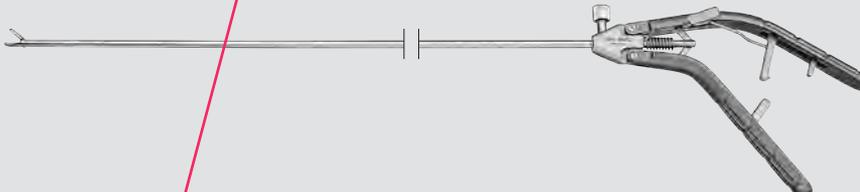

Units for use with Coagulation and Dissection Electrodes see chapter 17, UNITS

KOH Macro Needle Holders, KOH Assistant Needle Holder

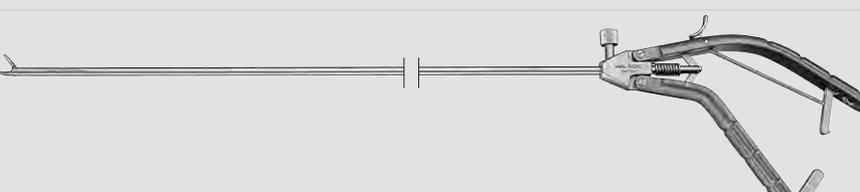

■ Size 5 mm

Operating instruments, lengths 33 and 43 cm, for use with trocars size 6 mm

2.17
Tiesiomis žiaunomis
Su pistoleto formos rankena
Skersmuo 5 mm
Darbinės dalies ilgis 33 cm

Components/Spare Parts see chapter 18

KOH Macro Needle Holders

■ Size 5 mm

Operating instruments, lengths 33 and 43 cm, for use with trocars size 6 mm

The 5 mm KOH macro needle holder allows precise holding of the needles.

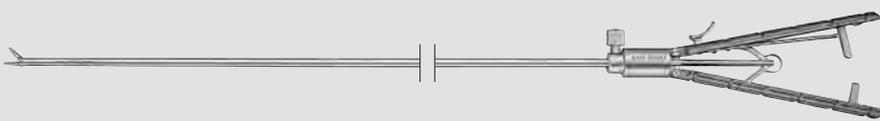

Special Features:

- Tungsten carbide inserts for secure holding of the needle
- Precise adjustable ratchet
- Axial and pistol handles

2.18
Tiesiomis žiaunomis
Su tiesia rankena

Injection Needle, LUER-Lock, diameter 1.6 mm

2.20
Skirta punkcijai
Su Luer Lock jungtimi;
Aduos skersmuo 1,6 mm;
Instrumento darbinės dalies (kaniulės) skersmuo 5 mm
Instrumento darbinės dalies (kaniulės) ilgis 36 cm.

Plastic Containers for Sterilization and Storage

of instruments

Plastic containers with transparent lid for secure fixation of instruments during sterilization and storage.

The plastic containers are suitable for sterilization with steam.

39351 J

27717 A

2.22
Skirtas laparoskopinių instrumentų
(siūlomo komplekto) sterilizavimui bei
laikymui
Perforuotas;
Su silikoniniais kilimėliais;
Dviejų aukštų.

39351 J

Plastic Container for Sterilization and Storage, perforated, with transparent lid, with silicone mat, **for two-level storage**, for use with 16 forceps and 8 instruments, external dimensions (w x d x h): 530 x 250 x 145 mm

27717 A

Plastic Container for Sterilization and Storage, perforated, with transparent lid and silicone mat, **for two-level storage**, external dimensions (w x d x h): 543 x 255 x 112 mm

NIR/ICG visualization modes

The Rubina® components offer users various new modes for visualizing the NIR/ICG signal. This includes the overlay of NIR/ICG data onto the standard white light image or alternatively the monochromatic visualization of the infrared signal alone.

Patient satisfaction is our priority

Overlay

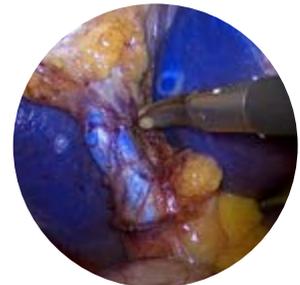

In overlay mode, the regular white light image is combined with the NIR/ICG data to generate an overlay image.

Source: Boni, Milan, Italy

Green or blue - you decide

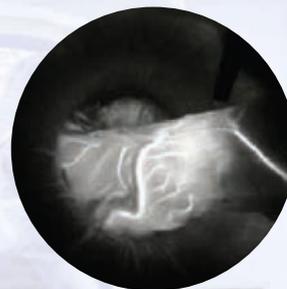

Depending on your preferences and application, the NIR/ICG data can be displayed as a green or blue overlay.

Source: Carlini, Rome, Italy

Monochromatic

In this mode, the NIR/ICG signal alone is displayed in white on a black background to achieve the greatest possible differentiation.

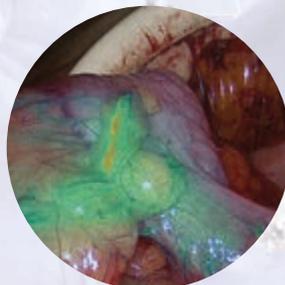

Source: Boni, Milan, Italy

Kokybės kriterijus nr. 3
ICG fluorescencinis režimas: fluorescencinio signalo intensyvumo atvaizdavimas skirtingomis spalvomis santykinėje skalėje.

Intensity Map

Displays the intensity of the NIR/ICG signal using a color scale in an overlay image.

Source: Zuend, Baar, Switzerland

Overview of IMAGE1 S™ Rubina® Components

TC201	IMAGE1 S CONNECT® II , connect module, for use with up to 3 link modules, resolution 3840 x 2160 and 1920 x 1080 pixels, with integrated KARL STORZ SCB or KS HIVE® and digital Image Processing Module, power supply 100-240 VAC, 50/60 Hz
TC304	IMAGE1 S™ 4U-LINK , link module, for use with IMAGE1 S™ 4U camera heads, power supply 100-240 VAC, 50/60 Hz, for use with IMAGE1 S CONNECT® TC200 or IMAGE1 S CONNECT® II TC201
TH121*	IMAGE1 S™ 4U Rubina® , Opal1® NIR/ICG, two-chip 4K UHD camera head, S-Technologies available, for NIR/ICG fluorescence imaging in combination with Power LED Rubina®, Opal1® NIR/ICG, progressive scan, low-temperature sterilization, focal length f = 19 mm, 2 freely programmable camera head buttons, for use with IMAGE1 S CONNECT® II and IMAGE1 S™ 4U-LINK
26606ACA	TIPCAM®1 Rubina® , Opal1® NIR/ICG, 4K/3D, high-resolution videoendoscope with two distally integrated video chips, for NIR/ICG fluorescence imaging in combination with Power LED Rubina®, Opal1® NIR/ICG and Sync Connecting Cable TL006, direction of view 0°, diameter 10 mm, length 32 cm, autoclavable , S-Technologies available, freely programmable camera head buttons, including video connecting cable, for use with IMAGE1 S CONNECT® II and IMAGE1 S™ 4U-LINK
26606BCA	Same , direction of view 30°
TL400	Cold Light Fountain Power LED Rubina® , for NIR/ICG fluorescence imaging and endoscopic diagnosis, with two LEDs and one KARL STORZ light cable connection, unit communication via KS HIVE®, power supply 100-125/220-240VAC, 50/60 Hz
495TIP	Fiber Optic Light Cable , with straight connector, extremely heat-resistant, enhanced transmission, with safety lock, diameter 4.8 mm, length 300 cm
39501XTC	Wire Tray , for cleaning, sterilization and storage of TIPCAM®1 S 3D videoendoscopes 26605AA/BA or TIPCAM®1 Rubina®, Opal1® NIR/ICG, 4K/3D 26606ACA, 26606ABCA, 26616ACA, 26616BCA and one light cable, autoclavable , external dimensions (w x d x h): 640 x 220 x 87 mm
UF101	One-Pedal Footswitch , one-stage
TM450	55" 4K/3D Monitor , screen resolution 3840 x 2160, image format 16:9, power supply 100-240 VAC, 50/60 Hz, wall-mounted with VESA 200 and VESA 300 adaptors
TM009	Signal Converter Set , 12G-SDI – 4x 3G-SDI, for use with 55" 4K/3D Monitor TM450
TM351	32" 4K/3D Monitor , screen resolution 3840 x 2160, image format 16:9, power supply 100-240 VAC, 50/60 Hz, wall-mounted with VESA 100 adaptor

Kokybės kriterijus nr. 1
Vaizdo apdorojimo
įrenginys (techninės
specifikacijos 1.3 punktas)
suderinamas su 4K (3840
x 2160 taškų) raiškos 3D
vaizdo endoskopais su
ICG funkcija.

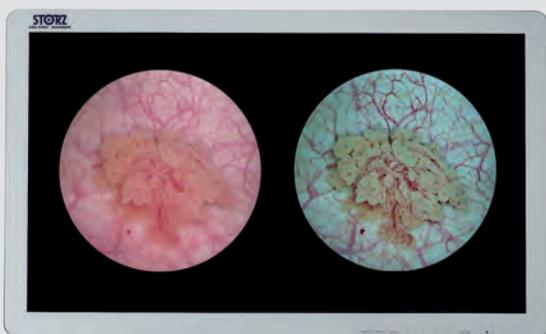

* For use with HOPKINS® Rubina® NIR/ICG telescopes or the VITOM® II ICG exoscope for open surgery

IMAGE1 S™

As individual as your requirements

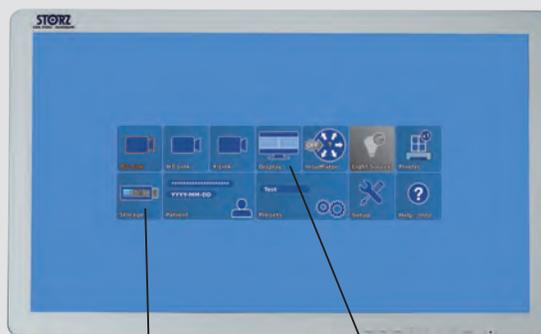

Innovative Design

- Side-by-side view: Parallel display of standard images and S-Technologies possible
- Multiple source management: Allows simultaneous control, display and documentation of image data from two connected image sources (e.g., for hybrid surgical procedures)
- Intuitive menu navigation (dashboard, live and setup menu)
- Icons show changes to settings or change of status
- Individual presets possible
- 50 patient datasets can be stored

Side-by-side view: Parallel display of a standard image and SPECTRA A

Kokybės kriterijus nr. 2
Režimas vienu metu,
šalia vienas kito (angl.
side by side) monitoriuje
vaizduojantis ir paprastą,
ir susiaurinto šviesos
spektra vaizdą.

4.2 Possible combinations

It is recommended that the suitability of the products for the intended procedure be checked prior to use. Please note that the products listed here may not yet be available in all countries due to differences in approval requirements.

Combination with camera control unit (CCU)

Camera head	CCU	LINK module
TH121	IMAGE1 S CONNECT II (TC201)	IMAGE1 S 4U-LINK (TC304)

Combination with endoscopes or adaptors

The product can be connected to endoscopes or adaptors via the eyepiece connection.

4.3 Technical data

Description	Value
Image sensor	2x 1/2.5" CMOS
Image format	16:9
Image refresh rate	50/60 Hz
Focal length	19 mm
