

Caring Cross
910 Clopper Road
Gaithersburg, MD, 20878
U.S.A.

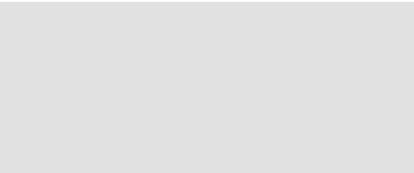

November 20, 2025

This memo is to confirm that the Caring Cross tender submission to provide Materials Used in the Manufacturing of Advanced Therapy Medicinal Products (11420) will deliver the following, in accordance with the Technical Specification:

- (1.1.1) Preclinical grade Lentiviral Vector (CX279), 1 vial (4mL) per dose
- (1.2) Human T Cell Enrichment Cocktail (T-Pure)

The materials will be delivered in a single shipment under Delivered Duty Paid (DDP) Incoterms, in accordance with Technical Specification (1). The materials will be stored at $\leq -65^{\circ}\text{C}$ until shipment, and shipped frozen and packed in dry ice (1.1.4). Transport and delivery will utilize a reliable, global courier service that will provide temperature control and monitoring (1.1.1), maintain chain of custody and traceability, and demonstrate compliance with applicable regulatory requirements and international customs.

Signed,

Director of Operations
