

Modern Hospital Cleaning
Is there a State-of-the-art?

Yes! Come and see.

The Healthguard System

State-of-the-art Solution for modern Hospital Cleaning. The unique Healthguard System meets the challenges of today's Hospital Cleaning.

- ✓ Excellent Hygiene Standards
- ✓ Cost-effective Cleaning
- ✓ Easy to Operate & Implement

1 Preparation & Impregnation

Impregnation of microfiber textiles with the correct amount of cleaning solution.

Manual or automatic pre-impregnation of microfiber textiles provides ready-to-use mops and cloths for moist, damp, wet or disinfecting methods. For each cleaner the necessary quantity of mops and cloths are arranged in the drawer boxes or buckets.

2 Cleaning & Disinfection

Every room is cleaned and disinfected with a separate clean mop and cloth to avoid cross-contamination.

The used mop and cloth are disposed in the adequate laundry net. Our microfiber textiles are State-of-the-Art and ensure a high dirt removal.

“How can Healthguard help to reduce the risk of HAI for Patients?”

The Healthguard System implements Best Hygiene Practice and Standards in cleaning and therefore minimizes the risk of Hospital Acquired Infection (HAI) caused by cross-contamination during the cleaning process.

“How can Healthguard help to increase User Satisfaction?”

The Healthguard System's simple cleaning process ensures optimal user satisfaction and improved hygiene standards.

“How does Healthguard secure my Hygiene Standards?”

The Healthguard System integrates the basic hygiene rules (e.g. to avoid cross-contamination by spreading germs during cleaning) into the cleaning process. Healthguard comes with a clear and hygienic working method.

- ✓ Hygienic Preparation of all cleaning textiles
- ✓ Using new textiles for each cleaning task
- ✓ Healthguard separates strictly the Clean and Dirty Process
- ✓ Healthguard supports correct Dosage and Application of disinfectants

3 Reconditioning

The microfiber textiles are laundered with an appropriate and recommended washing detergent.

The temperature and the washing detergent ensure the disinfection of the textiles. After washing the microfiber textiles are ready for use again.

! Advantages & Benefits

Professional Cleaning requirements in the Healthcare Business are very high. Our Healthguard System offers you:

- ▶▶ Excellent Hygiene Standards
- ▶▶ **Reduced Risk of Cross-Contamination**
- ▶▶ Cost-effective Cleaning
- ▶▶ **Increased Performance in Ergonomics and Economics**
- ▶▶ Easy to Operate & Implement
- ▶▶ **Safety for your Cleaning Staff**

State-of-the-Art Solution for modern Hospital Cleaning.

How can Healthguard help me to increase my Safety and Efficiency?

The Healthguard System implements a Standardized Process for hygienic cleaning. The improved ergonomics ensure Safe Handling for the user. The standardized cleaning process saves time and increases productivity.

“How can Healthguard help me to reduce my Costs for Cleaning?”

With the implementation of the Healthguard System the total operational costs for cleaning are lowered, thanks to

- ✓ Increased Productivity in the process
- ✓ Exact Dosing of product and Economic Use of water
- ✓ Especially lower washing costs with the use of lighter microfiber textiles

“

With the Ecolab Healthguard System I feel confident that the cleaning team uses best hygiene practice. Furthermore it gives me piece of mind that all cleaning processes are State-of-the-Art.
