Modular Windshield WS 6 Kit (XLR-5F)

Product Code: 086070

The Modular Windshield 6 Kit is suitable for stereo microphones from 351mm up to 400mm in length and 19-34mm diameter with a 5-pin XLR connector.

Main Benefits:

- Flexible, complete windshield and suspension package, which provides varying levels of windshielding for numerous microphone configurations
- The iconic Windshield Kit is the industry standard, and leads the way in windshielding and suspension technology

The Modular Windshield 6 Kit is suitable for stereo microphones from from 351mm up to 400mm in length and 19-34mm diameter with a 5-pin XLR connector.

Windshield Body Length: 450mm (WS4 + Extension 120mm)
 Total Windshield Length: 560mm (includes the End Caps)
 Height of Windshield 100mm
 Net Weight:
 Gross Weight:
 Windjammer Fur Length: 40mm
 Windjammer Fur Colour: Grey
 Microphone Connector: XLR-5F
 Max Wind-noise Attenuation: 50 dB

Finding the correct Windshield Kit will depend on the type, length and diameter of the microphone.

Because the whole microphone is encased in a windshield basket the total length of the microphone including the XLR cable must be accounted for, this means adding 50mm to the length of the mic.

For a windshield to work effectively the microphone should be mounted centrally within the windshield, therefore the microphone + XLR length should approximately equal the windshield body length. The body length of our windshields is the total length, excluding end caps.
