Universal chair FK-02 is intended for injection procedures. The frame of the medical treatment chair is made of metal constructions painted with powder polymer paint and has four height-adjustable legs. Two adjustable armrests make the injection procedure easier on both the left and right side of the patient. The chair has adjustment mechanisms for backrest and footrest. All parts of the chair are made of non-hazardous, non-allergenic materials, easy to clean and disinfect, fire and swelling resistant. The legs of the chair are covered with clear plastic, which is resistant to abrasion and disinfectants.

Parameters	Model FK-02
