

Massage table "CROSS 2"

The massage table is an ideal product in medical institutions and medical offices. It features a simple cross-shaped design with 2 or 4 wheels and an increased load of up to 200 kg. The table frame is made of steel, coated with powdered polymer paint. The height of the table is adjustable on both sides of the stand with the help of a remote control. All 4 rubber table legs with 1 cm height adjustment for precise leveling of the table. The body is made of 2 cm chipboard, padded with 2 cm thick elastic polyurethane foam and covered with artificial seamless leather. The coating is easy to clean, resistant to disinfectants, non-allergenic and does not change color.
