Dulbecco's Phosphate Buffered Saline (DPBS) w/o Calcium w/o Magnesium – L0615

Dulbecco's Phosphate Buffered Saline (DPBS) is intended for use in the maintenance of mammalian cells physiology and morphology. DPBS is commonly used for rinsing cells and as a buffer in many chromatographic assays or in cell enumeration as a diluent. DPBS is also used to wash cells during the dissociation process.

This product has neither calcium nor magnesium.
