<https://guil.es/en/products/quick-fix-clamp-for-o-38-51-mm-tubes-wll-100-kg-4/>

Aluminium slimline quick fix clamp for loads up to 100 kg. It comes with ergonomic knob + bolt and wing nut to secure, spotlights, electronic devices, etc. Designed to be used on trusses / tubes with an external diameter from 38 mm to 51 mm.

It has a special design which gives a fast attachment of devices with on with one hand due to it having a hook clamp shape.

The ergonomic securing knob makes the installation quicker, as thanks to this larger knob it is easier to tighten. Its thinner design makes it more appropriate for the installations where the space required for the installation of the clamp is limited.

By substituting the bolt and wing nut for an eye nut or any other fixture it can be used for other functions. Our quick trigger clamp ref. ABZ-07/E-N, combines strength and durability with a high level of safety.
