

Charisma® Smart Natural restorations? Easily!

Your new everyday composite rewards you with great value.

- » **You benefit from its colour-stabilising technology and easy polishability:** These features prevent staining of composite restorations in the long run and thus ensure natural results with little effort. On top, they bring convincing ease to your workflow.
- » **You feel comfortable with its easy handling characteristics and vital shades:** The composite facilitates simple single-shade layering techniques for natural everyday restorations with great value. Its excellent handling and modelling properties arise from our long-standing experience in composite technology. In short, Charisma Smart provides the smart way towards natural everyday restorations.

Charisma® Smart

Natural restorations? Easily!

Charisma Smart provides the smart way towards natural everyday restorations. It is an uncomplicated universal composite for everyday restorations with great value. We developed this light-curing, radiopaque filling material to cover your requirements for composite workability.

The new composite is really easy to handle and, through its vital shades, allows simple single-shade layering techniques for natural everyday restorations. It comes, of course, with the quality and reliability that arise from our long-term experience in composite technology.

The benefits of its colour-stabilising technology and effortless polishability make things even more easy for you:

- They prevent staining of composite restorations in the long run.
- They ensure natural results with little effort.
