HANEL Articulating Paper 200 µ

For the first stage of testing, to differentiate between areas of high and low masticatory pressure.

				Roll, 15 m	blue	40 µ	480 327

HANEL Articulating Silk 80 µ

High quality natural silk. A medium-fine material with progressive colour transfer, for use in the laboratory and dental practice.

blue	480 207	blue	480 217

HANEL Occlusion Foil 12 µ

The HANEL foil fulfills all the requirements needed for state of the art gnathology. The biaxial characteristics of the foil ensure that it is highly tear resistant yet elastic. It is extremely thin and the precise colour transfer guarantees pinpoint markings on high spots.

Start Set	
4 foils, à 5 m (black, red, green, blue)	
single-sided	480 563

Start Set	
4 foils, à 5 m (black, red, green, blue)	
double-sided	480 564

blue	480 057

HANEL Shimstock Foil

The Shimstock foil is a metal foil without a colour coating. When the teeth are in normal occlusion, this foil can be pulled through the ground-in contacts. If a muscle tonus exists, the foil is held back.
