

BROXO salt, granules 6 - 15 mm

Supplier: VWR Chemicals

Broxo water softener salt allows for problem free water softening that gives a great performance and is efficient in use. It is a very pure high-pressure compacted vacuum salt that dissolves evenly and gradually and is applicable to domestic and industrial installations. Broxo water softener can be used for both domestic and industrial use. The granules dissolve completely and evenly to leave no residual substances. The granules measure from 6mm up to 15mm and provide excellent performance. Also known as rock salt.

- Very pure high-pressure compacted vacuum salt (99,8% NaCl)
- For use in domestic and industrial installations
- Granules from 6 mm up to 15 mm

Formula: NaCl

MW: 58,44 g/mol

Boiling Pt: 1413 °C (1013 hPa)

Melting Pt: 801 °C

Density: 2,16 g/cm³ (20 °C)

MDL Number:

MFCD00003477

CAS Number: 7647-14-5

Merck Index: 14,08599
