

Doctor choice, patient comfort

PERCUTANEOUS ABSCESS AND MULTIPURPOSE DRAINAGE PRODUCTS

Cook Medical offers one of the widest assortments of drainage products available, while focusing relentlessly on patient comfort.

In this catalogue you will find:

- the right choice of multipurpose drainage catheters to suit each procedure,
- the technology that only a leader can provide, including Ultrathane® construction for patient comfort, hydrophilic coating for ease of insertion, radiopacity for precise placement,
- and the product qualities that you have come to expect, such as kink-resistance and consistent hub sizes.

This catalogue focuses on our percutaneous abscess and multipurpose drainage products.

To see our full range of percutaneous drainage products, please request these additional catalogues from your Cook representative:

- **Percutaneous Biliary Intervention Products**
- **Percutaneous Urinary Drainage Products**
- **Percutaneous Access, Targeting and Accessory Products**

Be sure to have the right drainage devices for each procedure, including your most challenging and complex cases.

The choice is yours.

Multipurpose Pigtail Drainage Catheter Needle Set

Used for percutaneous external drainage in multiple drainage applications (e.g., nephrostomy, abscess drainage, and other abdominal cavity drainage procedures).

- The catheter features a non-locking pigtail for retention.
- The trocar stylet fits into the catheter and the stiffening cannula. This assembly facilitates access by direct puncture.
- The stiffening cannula protrudes from the catheter tip in order to ease the advancement of the catheter over the wire guide.
- The catheter is supplied with a pigtail straightener.

Components

Universal Curved Drainage Catheter

Used for percutaneous drainage in a variety of drainage applications (e.g., nephrostomy, biliary, and abscess), either by direct puncture or Seldinger access technique.

- The curved tip configuration facilitates drainage in small cavities.
- Ultrathane® material enhances patient comfort.
- The Intro-Tip™ design helps to ease catheter insertion.
- The hydrophilic coating becomes very lubricious when activated, which reduces friction during insertion.

Non-Locking Multipurpose Drainage Catheter

Used for percutaneous drainage in a variety of drainage applications (e.g., nephrostomy, biliary, and abscess), either by direct puncture or Seldinger access technique.

- The catheter features a non-locking pigtail for retention.
- Ultrathane® material enhances patient comfort.
- The catheter can be inserted by direct puncture with the trocar stylet that is included or by Seldinger access technique.
- The 8.5 Fr catheter features Intro-Tip™ design that helps to ease catheter insertion.

Dawson-Mueller Multipurpose Drainage Catheter

Used for percutaneous drainage in a variety of drainage applications (e.g., nephrostomy, biliary, and abscess), either by direct puncture or Seldinger access technique.

- The 10 mm pigtail facilitates drainage in small cavities.
- Ultrathane® material enhances patient comfort.
- The Intro-Tip™ design helps to ease catheter insertion.
- The easy-to-use Mac-Loc® locking mechanism firmly secures the pigtail.
- The hydrophilic coating becomes very lubricious when activated, which reduces friction during catheter insertion.
- The catheter also comes in an extended length version with a 24 cm long sideport segment with a radiopaque band marking the location of the most proximal sideport.

Multipurpose Drainage Set – Micropuncture

Used for percutaneous drainage in a variety of drainage applications (e.g., nephrostomy, biliary, and abscess).

- Catheter placement is performed using micropuncture with the Neff Percutaneous Access Set that is conveniently included.
- Ultrathane® material enhances patient comfort.
- The easy-to-use Mac-Loc® locking mechanism firmly secures the 25 mm pigtail.
- The radiopaque band identifies the proximal area of the locking loop, which contains six large oval sideports to facilitate drainage.
- The hydrophilic coating becomes very lubricious when activated, which reduces friction during catheter insertion.
- The 8.5 Fr catheter features Intro-Tip™ design that helps to ease catheter insertion.

Multipurpose Drainage Set – Seldinger Technique

Used for percutaneous drainage in a variety of drainage applications (e.g., nephrostomy, biliary, and abscess) by Seldinger access technique.

- The set includes everything needed for an efficient catheter placement procedure using the Seldinger technique.
- The EchoTip® needle cannula enhances visibility under ultrasound.
- Ultrathane® material enhances patient comfort.
- The easy-to-use Mac-Loc® locking mechanism firmly secures the 25 mm pigtail.
- The hydrophilic coating becomes very lubricious when activated, which reduces friction during catheter insertion.
- The radiopaque band identifies the proximal area of the locking loop, which contains six large oval sideports to facilitate drainage.
- The 8.5 Fr catheter features Intro-Tip™ design that helps to ease catheter insertion.

Cook-Cope Locking Loop Multipurpose Drainage Catheter

Used for percutaneous drainage in a variety of drainage applications (e.g., nephrostomy, biliary, and abscess), either by direct puncture or Seldinger access technique.

- The large-bore catheter features a large lumen for higher flow rate and facilitates drainage of thick fluids that will not adequately drain through smaller devices.
- Ultrathane® material enhances patient comfort.
- The locking loop pigtail aids in catheter fixation.

Components

Order Number	Reference Part Number	Catheter Fr	Accepts Wire Guide Diameter inch	Catheter Length cm	Catheter Sideports	Trocar Stylet Needle gage

Thal-Quick Abscess Drainage Set

Used for abscess drainage.

- Multiple large, oval sideports increase drainage capacity.
- The large-bore, clear polyvinylchloride catheter features a radiopaque stripe to help visualise the catheter and its sideports during placement under fluoroscopy.
- The EchoTip® needle cannula enhances visibility under ultrasound.
- The heavy-duty wire guide offers increased support to facilitate placement of the catheter.

LARGE LUMEN DRAINAGE

Gordon Large-Bore Drainage Catheter

Used for abscess drainage.

- The large-bore catheter facilitates drainage of thick fluids that will not adequately drain through smaller devices.
- Ultrathane® material enhances patient comfort.
- The catheter can be inserted by Seldinger access technique. Access components are not supplied with the 22.0 Fr coaxial catheter.
- The hydrophilic coating becomes very lubricious when activated, which reduces friction during catheter insertion.

Ring-McLean Sump Drainage Set – Straight

Used for abscess drainage.

- The sump lumen allows the free flow of air and provides the ability to flush the catheter while the drain lumen is draining fluid.
- The straight tip configuration facilitates drainage in small cavities.
- Ultrathane® material enhances patient comfort.
- The catheter can be inserted by direct puncture with the trocar stylet that is included or by Seldinger access technique.
