To Whom It May Concern,

The product **AFIAS CRP**, manufactured by Boditech Med Inc., can be reliably used with both venous blood and capillary blood samples.

This declaration is supported by a clinical evaluation of CRP measurement conducted at Hillerød Hospital in Denmark, involving 114 subjects.

In this study, CRP concentrations measured from venous and capillary whole blood samples showed equivalent results, with no clinically significant differences observed.

The evaluation confirms that both sample types are suitable for use with our fluorescence-based immunoassay technology.

Based on this evidence, it is scientifically valid to conclude that AFIAS CRP is suitable for use with both venous and capillary whole blood samples.

Yours faithfully,

Boditech Med Inc.
