Corodyn P1/P2

Balloon floatation catheters made of Polyurethane (PUR)

Corodyn P1/P2	Code-Number	Sales unit-pcs.
---------------	-------------	-----------------

Balloon floatation catheters for hemodynamic pressure measurement

- catheter length 110 cm
- catheter marking every 100 mm from the catheter tip as an indicator of depth of introduction and position of catheter
- easy handling
- safe insertion
- radio-opaque
- excellent pressure transmission

Corodyn P1

Balloon floatation catheter with distal lumen

- made of PUR
- antithrombogenic material
- free of toxic plasticizers

F5	5011590	5
F6	5011698	5
F7	5011795	5

Corodyn P2

Balloon floatation catheter with two lumina for simultaneous pressure measurement and application of infusions or medications

- made of PUR
- antithrombogenic material
- free of toxic plasticizers
- distance between exit port and catheter tip 20 cm

F7	5021740	5
----	----------------	---

Corodyn TD / TD-I

Thermodilution catheters with balloon made of Polyurethane (PUR)

Corodyn TD	Code-Number	Sales unit-pcs.
------------	-------------	-----------------

Thermodilution catheter with balloon for measurement of haemodynamic pressure and cardiac output

- catheter (4 lumina) with lumen for injection of a cold bolus and distal lumen for pressure measurement
- catheter length 110 cm
- thermistor, 35 mm from catheter tip
- catheter marking every 100 mm from the catheter tip as an indicator of depth of introduction and position of catheter
- easy handling
- safe introduction
- radio-opaque
- excellent pressure transmission
- thermistor resistance at 37°C 14,000 Ω ± 15 %, sensitivity 520 Ω/°C
- special three-pin plug connector for all standard computers and patient monitors
- made of PUR
- antithrombogenic material
- free of toxic plasticizers

Corodyn TD

Corodyn touch-free

Thermodilution catheters with balloon made of Polyurethane (PUR)

Corodyn TD touch-free

Code-
Number

Sales
unit-pcs.

Thermodilution catheter with balloon for measurement of haemodynamic pressure and cardiac output

Catheter with touch-free contamination guard

- catheter contamination guard (110 cm)
- test chamber
- special connection of the contamination guard to the sheath

Corodyn TD catheter

- catheter (4 lumina) with lumen for injection of a cold bolus and distal lumen for pressure measurement
- catheter length 110 cm
- thermistor, 35 mm from catheter tip
- catheter marking every 100 mm from the catheter tip as an indicator of depth of introduction and position of catheter
- easy handling
- insertion
- radio-opaque
- excellent pressure transmission
- thermistor resistance at 37 °C $14,000 \Omega \pm 15 \%$, sensitivity $520 \Omega/^\circ\text{C}$
- special three-pin plug connector for all standard computers and patient monitors
- made of PUR
- antithrombogenic material
- free of toxic plasticizers

Corodyn TD touch-free

Eledyn

Bipolar temporary balloon probe for anaesthesia and intensive care

Eledyn

Code-
Number

Sales
unit-pcs.

Bipolar temporary balloon probe for transvenous heart stimulation

- excellent push and flexibility
- catheter material: antithrombogenic Polyurethane (PUR), free of toxic plasticizers
- the use of stainless steel for electrode rings and wires avoids formation of galvanic elements
- stainless steel, gold-plated 2 mm pins

▪ **stimulation probe** 110 cm

- catheter marking every 100 mm from tip of the probe as an indicator of depth of introduction and position of the probe
- bipolar

▪ **electrodes**

- electrode length 3 mm
- electrode distance 10 mm
- torque stability due to material and design
- radio-opaque

▪ **with floatation balloon**

▪ **Omnifix® Lock**

- disposable syringe
- with plunger stop for exact volume of air / CO2 for balloon inflation
- for connection to balloon lumen with stopcock

Eledyn stimulation probe with balloon F5

Add-ON kit for Eledyn 2/F6 and Eledyn F5 EB10

- 1 Contamination guard
- 4 Gauze pads 10 x 10cm, 8 plies
- 1 Cutfix scalpel Fig. E11
- 1 Seldinger puncture needle 1.3 x 70 mm, light pink
- 1 Guide wire J3 SFU70-035 in dispenser and with a straightener
- 1 Intradyn® venous hemostasis introducer F6 with a blue stop cock, two closing cones and one protection cover.

Add-ON set for Eledyn 2/F6 and Eledyn F5 EB10

5150020

10

Eledyn 2/FX

Bipolar temporary stimulation probe for anaesthesia, intensive care and electrophysiology

	Eledyn 2/FX	Code-Number	Sales unit-pcs.
--	-------------	-------------	-----------------

Bipolar temporary stimulation probes for transvenous heart stimulation and electrophysiology

- radiopaque catheter body
 - made of antithrombogenic Polyurethane
 - free of toxic plasticizers
 - length markings in step of 10 cm
 - touch protected connectors
- color coded hub for easy identification of catheter sizes

Technical data

- electrode distance: 10 mm
- material: stainless steel
- effective length: 112 cm
- catheter material: Polyurethane, radio-opaque
- resistance: < 60 Ω
- plug: 2 mm stainless steel

Eledyn 2/F4

Tear-Away introducer sheath F6

Combitrans®

Monitoring kits with disposable transducer Basic kits

Combitrans®

Code-
Number

Sales
unit-pcs.

Monitoring kit with disposable transducer for physiological pressure measurement

Complete system

- for high transmission of pressure signal
- time reducing
- avoids contamination at connections and during blood sampling

Combitrans® Monitoring kit

- **Intrafix M**
 - special administration kit for pressure measurement
- **Combitrans® flush device**
 - quick flush rate ≥ 1 ml/s
 - continuous flush rate 3 ml/h at 300 mmHg
- **Combitrans® disposable transducer**
 - compact and 100 % tested unit with excellent pressure transmission
 - can be used in combination with all CF-class monitors
 - adapts to interface cable with plug connection
 - modern chip technology for an accurate registration of values
 - precalibrated sensor with constant electrical parameters (sensitivity, linearity, zero stability)
 - straight fluid channel for an easy air-bubble free filling
- **Discofix-3**
 - 2 three-way stopcocks red (arterial), blue (venous) or yellow (pulmonal arterial)
- **Combidyn® pressure tubing 125 cm**
 - $\varnothing 1.5 \times \varnothing 2.7$ mm
 - with red (arterial), blue (venous) or yellow (pulmonal arterial) stripe
- **Combidyn® pressure tubing 20 cm**
 - $\varnothing 1.5 \times \varnothing 2.7$ mm
 - with red (arterial) stripe, blue (venous) or yellow (pulmonal arterial) stripe

Combitrans® Monitoring kit

red (arterial)	5202620	20
blue (venous)	5202604	20

Sales
unit-pcs.

Monitoring kit with disposable transducer for measurement of arterial pressure and CVP (central venous pressure)

Complete system

- for optimal transmission of pressure signal
- time reducing

Exadyn-Combitrans® Monitoring kit

- **Intrafix M**
 - special administration kit for pressure measurement
- **Combitrans® flush device**
 - quick flush rate ≥ 1 ml/s
 - continuous flush rate 3 ml/h at 300 mmHg
- **Combitrans® disposable transducer**
 - compact and 100 % tested unit with excellent pressure transmission
 - can be used in combination with all CF-class monitors
 - adapts to interface cable with plug connection
 - modern chip technology for an accurate registration of values
 - precalibrated sensor with constant electrical parameters (sensitivity, linearity, zero stability)
 - straight fluid channel for an easy air-bubble free filling
- **Discofix-3**
 - 2 three-way stopcocks red handle (arterial)
 - 1 three-way stopcock blue handle (venous)
- **Combidyn® pressure tubing 125 cm**
 - $\varnothing 1.5 \times \varnothing 2.7$ mm
 - with red (arterial) or blue (venous) stripe
- **Combidyn® pressure tubing 20 cm**
 - $\varnothing 1.5 \times \varnothing 2.7$ mm
 - with red (arterial) stripe
- **Exadyn special 90° stopcock**
 - 90° two-way safety stopcock for switch between arterial and venous measurement
 - no shunts possible

Exadyn-Combitrans® Monitoring kit

5202507

20

PVC free

Exadyn-Combitrans® Monitoring kit PVC-free

Monitoring kit with disposable transducer for measurement of arterial pressure and CVP
- same configuration as above, however, **all components PVC-free** for active environmental protection

Exadyn-Combitrans® Monitoring kit PVC-free

5212391

20

Exadyn-Combitrans® Monitoring kit long tubings

Monitoring kit with disposable transducer and long tubings for measurement of arterial pressure and CVP

- same configuration as above, but with 200 cm long tubings instead of 125 cm

Exadyn-Combitrans® Monitoring kit long tubings

5206994

20

Combitrans® Special

Monitoring kits with disposable transducer Customized kit solutions

		Code- Number	Sales unit-pcs.
	<p>Create your individual Combitrans® monitoring kit for invasive pressure measurement</p> <p>Individual and user-friendly solutions are combined with economical and ecological advantages:</p> <ol style="list-style-type: none"> 1. Service through sales representative: Demand analysis - kit proposal - sample and individual kit configuration according to your requirements - offer 2. Customized and user-friendly: Your made-to-order solution out of our large B. Braun range - reduction of preparation time - designed and packaged due to customer specification - one order number 3. Economical: Standardization of work practices - relief of clinic personnel - easy material management - less money tight up for storage - less administration 4. Ecological: Reduced packaging volume and waste - easy disposal <p>Components:</p> <ul style="list-style-type: none"> - Intrafix „M“ special administration kit 150 cm - Combitrans® flush device 3ml/h - Combitrans® disposable transducer - Discofix three-way stopcock, red - Discofix three-way stopcock, white - Combidyn® pressure tubing, red, 1.5 x 2.7 x 300 mm - fixation tape 1.5 cm x 40 cm, velcro <p>Combitrans® Monitoring Kit „Fixation tape“ Monitoring kit to fix the transducer at the patient's arm. High pressure transmission due to short pressure tubing</p> <ul style="list-style-type: none"> - easy patient care, especially in intensive care units due to a short and direct connection between transducer and puncture site - high transmission of pressure signal - less dead volume in the pressure tubing - less tubing in working area 	<p>5216200</p>	<p>20</p>

Combitrans® Special

Monitoring kits with disposable transducer Customized kit solutions

Combitrans® Monitoring Double Kit (without illustration)

- Intrafix special administration kit, double
- two Combitrans® disposable transducers with flush device 3 ml/h and Discofix three-way stopcock (red and blue)
- two Combidyn® pressure tubing 125 cm (red and blue)
- two Discofix three-way stopcocks (red and blue)
- Combidyn® 20 cm red as arterial extension

Combitrans® Monitoring Double Kit (without illustration)

Haemofix®-Combitrans®

Monitoring kit with disposable transducer for closed blood-sampling

Haemofix®-Combitrans®

Code-
Number

Sales
unit-pcs.

Monitoring kit with disposable transducer for physiological pressure measurement and closed blood sampling

Complete System

- integrated reservoir and port for closed blood sampling
- high accuracy for blood gas analysis and low risk of contamination is achieved with minimum blood waste
- time reducing

Haemofix®-Combitrans® Monitoring Kit

- Intrafix „M“ administration kit
- Combitrans® flush device 3ml/h
- Combitrans® disposable transducer
- Discifix three-way stopcock, red
- Combidyn® pressure tubing 1.5 x 2.7 x 1800 mm red with integrated Haemofix® reservoir 5 ml (20 cm prior to transducer) and blood sampling port (30 cm prior to distal end)

Haemofix®-Combitrans® Monitoring Kit

5213505

20

Haemofix®-Exadyn Monitoring Kit (without illustration)

Same configuration as 5213505 but with the option to switch between arterial pressure and CVP.

Additional components:

- Exadyn special 90° stopcock
- Combidyn® pressure tubing 1.5 x 2.7 x 1500 mm, blue
- Discifix three-way stopcock, blue

Haemofix®-Exadyn Monitoring Kit (without illustration)

5213516

20

Haemofix®-Combitrans® Monitoring Kit double (without illustration)

Same configuration as 5213505 but with a second venous line, which allows the simultaneous measurement of two pressures.

Additional components:

- Combitrans® disposable transducer with flush device 3ml/h and Discifix three-way stopcock blue
- Combidyn® pressure tubing 1.5 x 2.7 x 1500 mm, blue
- Discifix three-way stopcock, blue

Haemofix®-Combitrans® Monitoring Kit double (without illustration)

5213527

20

Blood sampling adapter

- for needle-free blood sampling with blunt, concealed cannula
- single, sterile packaging
- Luer Lock

Sales
unit-pcs.

Percutaneous catheter introducer kit using the Seldinger technique according to Desilets-Hofmann

- **Intradyn® puncture needle, according to Seldinger, 1.3 x 70 mm (18 G)**

- stainless steel, \varnothing 1.3 mm (18G)
- smoothly tapered fitting for easy introduction of the guide wire

- **Guide wire, 40 cm**

- stainless steel, \varnothing 0.035 „/0.89 mm
- flexible straight tip

- **Vessel dilator, 205 mm, made of FEP**

- flexible, causing minimal trauma to vessels
- smoothly tapered transition to guide wire

- **Sheath, 115 mm, made of PUR**

- thin-walled
- smoothly tapered transition to vessel dilator

- **Hemostasis valve**

- to avoid retrograde blood flow
- for venous application
- smoothly tapered transition for easy introduction of catheter
- sideport with mounted three-way stopcock for easy administration of I.V. solutions and injection of medications
- Lock-fitting

Create your individual Intradyn® Intensive Care Kit

Customized and user-friendly solutions are combined with economical and ecological advantages:

1. Service through sales representative:

Demand analysis - kit proposal - sample and customized kit configuration according to your requirements - offer

2. Individual and user-friendly:

Your made-to-order solution out of our large B. Braun range - reduction of preparation time - designed and packaged due to customer specification - one order number

3. Economical:

Standardization of work practices - relief of clinic personnel - easy material management - less money tight up for storage - less administration

4. Ecological:

Reduced packaging volume and waste - easy disposal

Intradyn®

Accessories

Catheter contamination guard for Intradyn® hemostasis introducer sheath

- proximal: fitting for safe fixation of the catheter or probe
- transparent contamination guard for visual control prevents contamination of catheters and probes during their introduction
- special connection to the sheath due to bayonet locking, 120 cm

	Code-Number	Sales unit-pcs.
Catheter contamination guard	5210178	50

Intradyn® guide wires (ø 0.035"/0.89mm) (without illustration)

J3-tip with straightener in dispenser	5050529	25
---------------------------------------	---------	----

Haemostop

Hemostasis valve for insertion of catheters and probes combined with, e. g. Intradyn® venous without hemostatic valve

- avoids blood leakage
- smooth introduction of catheters and probes
- no closing cone
- Luer Lock-fitting
- valve for arterial and venous use
- continuous hemostasis

Haemostop	5209641	50

Intradyn® Tear-Away

Tear-Away Introducer

Intradyn® Tear-Away

Code-
Number

Sales
unit-pcs.

Tear-Away introducer sheath using the Seldinger technique according to Desilets-Hofmann
 – the pre-scored tearing line ensures a clean and easy sheath removal after catheter placement
 – the spin-lock connector holds dilatator and sheath together, preventing dilatator from backing out of sheath during vascular access

Intradyn® Tear-Away

- **Intradyn® puncture needle according to Seldinger 1.3 x 70 mm (18 G)**
 - made of stainless steel
 - smoothly tapered hub transition for easy introduction of guide wire
- **Guide wire 40 cm**
 - made of stainless steel, \varnothing 0.035" / 0.89 mm
 - flexible J3-tip and flexible straight tip
- **Vessel dilatator, 190 mm made of PE**
 - flexible, minimal trauma to vessels
 - smoothly tapered transition to guide wire
- **Introducer sheath, 160 mm made of FEP- thin-walled**
 - smoothly tapered transition to vessel dilatator
- **Syringe Luer lock-fitting 10 ml**

Arteriofix

Arterial catheter kits

Arteriofix

Arterial catheter kit for invasive monitoring of blood pressure and blood sampling using the Seldinger technique

- **Introducer needle** made of stainless steel
 - smoothly tapered hub transition for easy insertion of guide wire
 - integrated design, providing smooth transition from guide wire to needle and needle to catheter to ensure minimal trauma at puncture site
 - Luer lock fitting
- **Catheter** made of FEP
 - for pressure transmission and good physical and mechanical properties of the material
 - excellent tissue and blood compatibility
 - smooth surface prevents thrombogenesis
 - special tip for easy insertion
 - FEP catheters have good gliding characteristics during insertion
 - fixation wings at proximal end
 - colour-coded Luer lock-fittings
- **Guide wire** made of stainless steel
 - flexible straight tip
 - designed according to the different inner diameters of catheters

Arteriofix V

Arterial catheter kits

Arteriofix V	Code-Number	Sales unit-pcs.
--------------	-------------	-----------------

This new version of Arteriofix® convinces with its outstanding new features and with established components.

Catheter, consisting of:

- **Capillary**
 - made of FEP
 - excellent tissue and blood compatibility
 - smooth surface prevents thrombogenesis
 - special tip for easy insertion
 - outstanding gliding characteristics during insertion
- **Fixation wings**
 - wings made of PUR
 - soft wings adapt easily to the skin
 - three suture holes
 - continuous and smooth transition between wings and capillary
- **Connecting tubing**
 - 7 cm long PUR tubing
 - distance between puncture site and the connection area
 - strain relief at the puncture site during connection
- **Valve**
 - avoids blood reflux and facilitates the handling
 - provides a high leak tightness
 - does not affect the pressure measurement results

Introducer needle made of stainless steel

- smoothly tapered hub transition for easy insertion of guide wire
- integrated design, providing smooth transition from guide wire to needle and needle to catheter to ensure minimal trauma at puncture site
- Luer Lock fitting

Guide wire made of stainless steel

- flexible straight tip
- designed according to the different inner diameters of catheters
