Features

- Hinged Eppendorf Safe-Lock lid prevents unintentional lid opening during incubation and storage
- g-Safe[®]: Depending on Safe-Lock Tube variant (see manual) exceptional centrifugation stability up to 30,000 × g prevents sample loss due to tube breakage and provides extra safety when working with hazardous samples

- Manufactured without the use of slip agents, plasticizers, and biocides – substances that have been shown to leach from plastic consumables into the sample and negatively affect bio-assay results
- Polypropylene provides high resistance to chemicals, mechanical stress and temperature extremes
- Precise lid sealing for minimal evaporation rates during long-term storage
- Large frosted lid and surface on the side for easy labeling
- Ensured functionality from -86 °C to 100 °C
- Autoclavable when open (121 °C, 20 min)
- Also available in Eppendorf Quality and in purity grades of lot-certified Biopur® and Forensic DNA Grade
- Also available in variants Eppendorf Protein LoBind or Eppendorf DNA LoBind for maximum recovery of valuable samples and in amber for light-sensitive samples
