Volume:  
Storage:  
Sterility:

**MCC-A**  
**500 ml**  
**+2°C to +8°C**  
**Sterile-filtered**

---

## Description

**McCoy's 5A Medium** was formulated to support liver tumor cells by modification of the amino acids found in Basal Medium Eagle. The enriched formulation is suitable for a variety of established cell lines as well as primary cells.

This formulation of **McCoy's medium** is supplemented with **L-Glutamine**.

Liquid media provide basic nutrients for all cell culture applications. Each of our high-quality cell culture media is manufactured according to the originally published formula or modifications essential to the consistent performance and stability of the culture medium.
