

## Silicone Reservoir and Closed Systems

### FEATURES

Post-operative drainage system with low vacuum aspiration level, ideal for use with Jackson-Pratt type silicone drains. Clear silicone reservoirs available in various capacities and featuring anti-reflux valve. Drentech® Pump standard and Drentech® Closed with collection bag 200 & 400 ml reservoirs are with double connector for allowing multiple drains attachment.

#### Drentech Pump

CODE	CAPACITY
10400	100 ml
10410	200 ml
10420	400 ml
PACKAGING: 10 PIECES PER BOX	

#### Drentech Closed

CODE	CAPACITY	BAG CAPACITY
22610	100 ml	200 ml
22620	200 ml	600 ml
22630	200 ml	200 ml
22600	400 ml	600 ml
PACKAGING: 10 PIECES PER BOX		

Replacement bag is available separately from the set, sterile package

#### Collection bag

CODE	CAPACITY
12004	600 ml
12014	600 ml no tap
PACKAGING: 25 PIECES PER BOX	
12015	200 ml
PACKAGING: 50 PIECES PER BOX

## Silicone Drainage System

**REDAX®**

from experience, new drainage technologies

Redax manufactures a wide range of high quality drains designed for post-operative applications.

Silicone drains are developed in different profile and fenestration to satisfy any clinical needs.

All silicone devices are tested for haemocompatibility and biocompatibility.

Drain tubes are designed with atraumatic profile and feature radiopaque x-ray line.

Redax realizes also a complete range of silicone reservoirs for post-operative low vacuum drainage. Silicone bulb are available also with collection bag.

## Pre cut Silicone Wound Drains

### FEATURES

High quality silicone drain designed mainly for gravity • Pre-cut 50 cm length • Atraumatic elliptical eyes • Radiopaque line along entire length and depth reference marks every 2 cm. Available in a wide range of size also with 2 liter collection bag.

## Flat and round Silicone Drains Jackson-Pratt® type

### FEATURES

Silicone drains like Drains Jackson-Pratt type are realized in two different profile: flat and round with a special fenestration of 20 cm length. Tube is totally transparent, ideal for post-operative drainage allowing continuous aspiration. Made of soft material ensuring atraumatic patient drainage.
