Aprašymas

Jelonet - tinklelinis impregnuotas minkštu parafinu marlės tvarstis

Dėl vaško impregnavimo suteikia lengvą skausmą malšinantį poveikį
Neprilimpa prie žaizdos paviršiaus
Sekretas laisvai nuteka į antrinį absorbuojantį tvarstį
Mažina skausmą perrišimo metu

Skirtas vienkartiniam naudojimui. Sterilus.
Tvarstis sterilus, kol nepažeista individuali pakuotė.

Indikacijos

Paviršiniai nudegimai, nuplikymai
Mažos odos žaizdos, plėštinės žaizdos, įbrėžimai
Po odos persodinimo, odos transplantacijos
Maitinančių mamų pažeisti, sutrūkinėję speneliai
Kojų opos, pragulos
Švarios paviršinės žaizdos

Kontraindikacijos ir atsargumo priemonės

Nenaudoti jeigu esate alergiškas bet kuriai sudedamajai medžiagai
Pasireiškus odos sudirginimui ar alerginei reakcijai, tvarstį nebenaudokite ir kreipkitės į gydytoją.
Jelonet negalima naudoti infekuotų žaizdų gydymui

ALLEVYN◇ LIFE: High exudate performance delivers improved wound outcomes[31]

Unique five-layer design, available in a range of dressing shapes and sizes designed to enhance patient wellbeing

ALLEVYN LIFE is highly rated for product performance (N=40)[1]

75% of nurses rated ALLEVYN LIFE as better for overall performance vs. previous dressings

Most nurses rated ALLEVYN LIFE as 'excellent' or 'very good' for:

- Exudate management
- Ability to conform to wound site
- Retention of exudate during removal

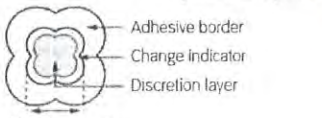
ALLEVYN® Life

SILICONE ADHESIVE — SILICONE GEL ADHESIVE DRESSING
HIGH — HIGH ABSORBENCY
CHANGE INDICATOR — DRESSING CHANGE INDICATOR
LOCK AWAY CORE — LOCK AWAY CORE
EN

smith&nephew

Description

ALLEVYN® Life is a silicone gel adhesive dressing that provides the optimal moist wound environment to promote the healing of moderately and highly exuding wounds. The absorbent pad has a foam layer and lock away core made from super absorbent material. There is a discretion layer over the centre to mask the exudate. The silicone adhesive layer is gentle even to fragile skin and makes it easy to apply, reposition and remove. A breathable outer film helps prevent bacterial contamination and is showerproof.



Intended Use

1. Wound management by secondary intention on shallow, granulating wounds, chronic and acute exudative wounds, full and partial thickness wounds including:
- Pressure ulcers
- Leg ulcers
- Diabetic Foot Ulcers
- Surgical wounds
- First and second degree burns
- Donor sites
- Skin tears
- Fungating Ulcers

Can be used in conjunction with INTRASITE® Gel for necrotic or sloughy wounds.
2. Pressure ulcer prevention on intact skin as part of a pressure ulcer prevention protocol.

42. poz.

Precautions

- Do not cut the absorbent pad as internal dressing components may contaminate the wound leading to delayed healing.
- Do not immerse the dressing in water.
- Do not use with oxidising agents such as hypochlorite solutions (e.g. EUSOL) or hydrogen peroxide as these can reduce the absorbency of the dressing.
- If reddening or sensitisation occurs discontinue use.
- The use of ALLEVYN® Life as part of a prophylactic pressure ulcer prevention therapy, does not preclude the need to continue to develop and follow a comprehensive pressure ulcer prevention protocol (e.g. regular turning, appropriate mattress and skin care).
- Single use only. If used on more than one patient cross contamination or infection may occur.
- Once opened, do not retain unused dressings for application at a later date.
- If used on infected wounds, the infection should be inspected and treated as per local clinical protocol.

For more information please visit: www.allevynlife.com

Instructions for use:

Cleanse the application site. Ensure surrounding skin is clean, dry and free from excess hair.

1. Select appropriate dressing size. Ensure the absorbent pad covers the entire wound or area to be protected. The scale on the pouch is for guidance only.
2. Remove first liner and anchor the adhesive side of the dressing to the skin.
3. Remove remaining liner. Smooth over. If on a wound ensure absorbent pad covers the wound. Do not stretch the dressing.
4. Smooth down the borders. Ensure there are no creases that could compromise the seal. The dressing can be repositioned as required.

Observation: When used for pressure ulcer prevention, frequently inspect the skin for pressure damage by lifting back one corner, inspecting and then repositioning the dressing.

Removal: Lift one corner and slowly peel back until completely removed.

Frequency of change

During the early stages of treatment inspect the dressing frequently. Dressings can be left in place for up to 7 days, except the sacral area where dressings can be left in place for up to 5 days. Dressings should be changed depending on the condition of the wound and surrounding skin or when exudate covers 75% of the change indicator. Consider changing if the exudate covers more than 50% of the change indicator. The diagram below is for guidance only and the decision of when to change should be dependent upon clinical assessment and local protocols under the guidance of a Healthcare Professional:

Aprašymas.

ALLEVYN ™ Life yra silikono – putų poliuretano tvarstis, kuris palaiko optimaliai drėgną žaizdos aplinką, skirtas vidutiniškai ir gausiai eksuduojančių žaizdų gydymui. Absorbuojantis paviršius turi putų poliuretano sluoksnį ir sekretą sugeriantį, bei sulaikantį sluoksnį, pagamintą iš super absorbuojančios medžiagos. Taip pat yra indikatoriaus sluoksnis virš centro, kuris leidžia stebėti eksudato sugėrimo laipsnį. Silikono lipnus sluoksnis yra švelnus net gležnai odai, tad tvarstį lengva taikyti, perklijuoti ar pašalinti. Kvėpuojanti ir vandeniui atspari išorinė plėvelė padeda išvengti užkrėtimo bakterijomis ir palieka galimybę prausti klientą.

Paskirtis

1. Žaizdos valdymas antrinio tvarsčio ant seklių, granulių formos žaizdų, ūmios ir lėtinės eksudacijos žaizdų, pilnų ir dalinių storio žaizdų, įskaitant:
   - pragulos
   - Kojų opos
   - Diabetinės pėdos opos
   - žaizdų infekcijos
   - Piktybiniai navikai
   - Chirurginės žaizdos
   - pirmojo ir antrojo laipsnių nudegimų
   - Donorinių plotų
   - Šlapiuojančių žaizdų
   - Fungating Opos

   Gali būti naudojamas kartu su INTRASITE ™ GEL želė nekrotinių ar Staigns žaizdų

pragulų, kojų opų, diabetinių pėdų opų, chirurginių ir kt. žaizdų gydymui. Lipniais kraštais, gerai laikosi, nuėmus nelieka klijų likučių, nelimpa prie žaizdos

2. Pragulų prevencijai ant nepažeistos odos.

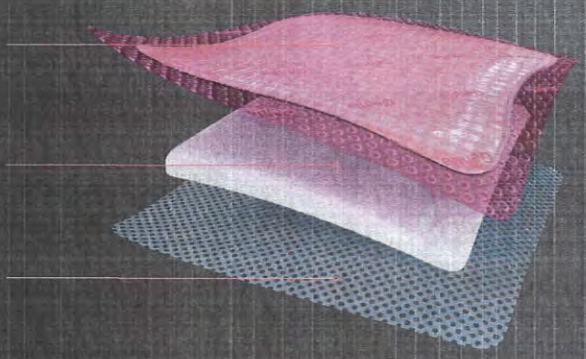
ALLEVYN◇ Gentle Border:
Helps you by caring for your patient

Triple-layer design creates an optimum moist wound healing environment that encourages wound closure[17]

Breathable top film to release moisture as needed to create an optimum moist wound healing environment[12,23,24]

Hydrocellular foam core pad to absorb exudate[12]

Wound contact layer with **soft silicone adhesive** for easy application and minimal pain and trauma for the patient on removal[12,24]



Proven to improve patient quality of life[17,18,24]

98% comfort achieved for patients during wear[18]

- Minimal trauma to the wound or the surrounding skin on dressing removal[24]
- Rated as excellent in its ability to conform and stay in place on wounds in awkward areas[17]

96% of patients experienced no pain on dressing removal[18]

...leading to optimised wound healing and patient satisfaction[12,17,18]

Adaptability offered through a wide range of shapes and sizes to accommodate multiple wound needs

Easy to cut* to size, without shedding, adding further flexibility[25]

Multi-way stretch helps with awkward and mobile locations[23]

* The bacterial properties of the dressing will be compromised if it is cut

ALLEVYN◇ GENTLE BORDER

Foam Dressing

Supporting healthcare professionals

Medical device-related pressure injuries are increasing in frequency, yet many can be prevented[2]

Consider applying dressings that demonstrate pressure redistribution and absorb moisture from body areas in contact with medical devices, tubing and fixators[2]

In accordance with your protocol, continue to lift and/or move the medical device for regular skin inspections and reposition for pressure relief[2]

Device: (NIPPV) Non-invasive positive pressure ventilation/BIPAP
Area at risk: Forehead, nose, cheeks

Device: Nasotracheal tubes/Nasal cannulas
Area at risk: Nose, cheeks, ear

ALLEVYN™ Gentle border

ALLEVYN™ Gentle border yra lipnus putų poliuretano tvarstis su silikono geliu, sukuriantis gyjančios žaizdos optimalaus drėgnumo aplinką, skatinančią vidutiniškai ir labai šlapiuojančių žaizdų gijimą. Sugeriamąjį sluoksnį sudaro poliuretano putos. Lipnus silikono sluoksnis yra labai švelnus net jautriai odai ir jį lengva uždėti, perkelti į kitą vietą ir nuimti. Orui laidus išorinis sluoksnis apsaugo nuo bakterijų patekimo ir yra atsparus vandeniui (galima praustis nenuėmus tvarsčio).

Indikacijos

Negilių, granuliavimo stadijos žaizdų, lėtinių ir ūminių šlapiuojančių žaizdų, viso ir dalinio storio žaizdų priežiūra antriniu būdu, įskaitant:

- kojų opas;
- diabetinės pėdos opas;
- chirurgines žaizdas;
- pirmojo ir antrojo laipsnio nudegimus;
- odos transplantato donoro žaizdas;
- plėštines odos žaizdas;
- pragulas.
