FAQ

KnockOut™ D-MEM is a basal medium optimized for growth of undifferentiated embryonic and induced pluripotent stem cells (1). The osmolarity is optimized to approximate that of mouse embryonic tissue.

Contains no L-glutamine.

For Research Use Only. Not for use in diagnostic procedures.

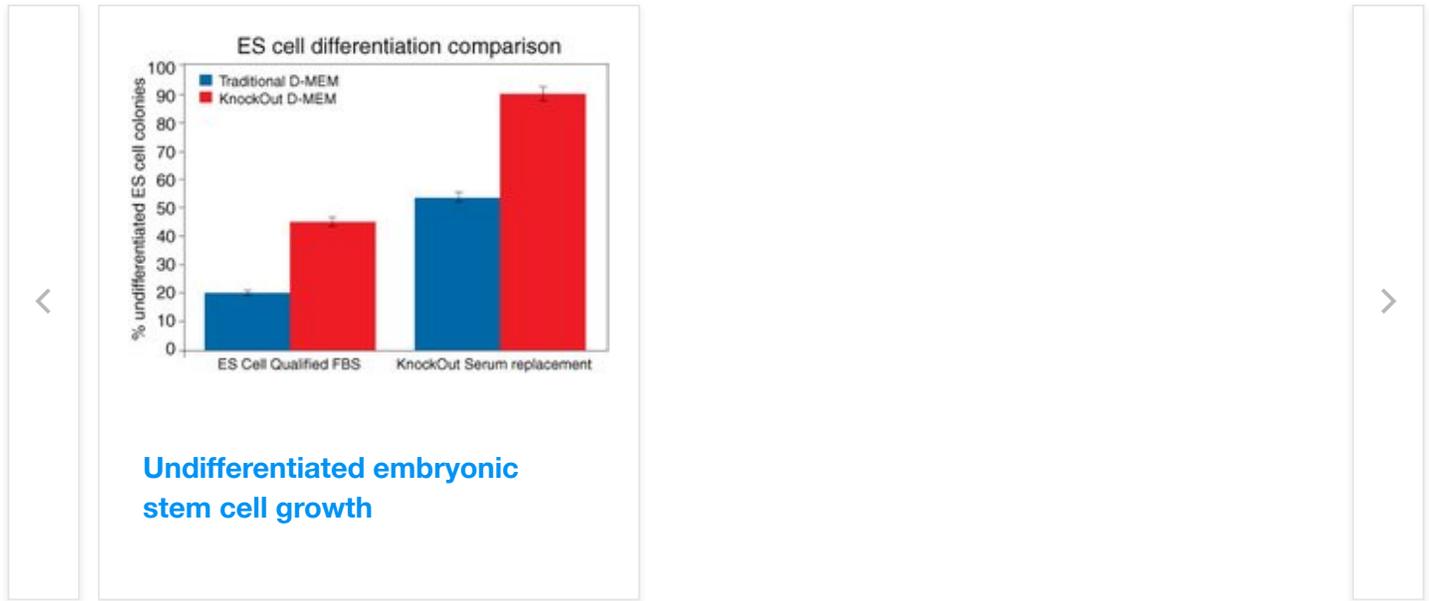

Specifications

Cell Type	Stem Cells (Embryonic), Stem Cells (iPS - Induced Pluripotent Stem)
Form	Liquid
Product Type	KnockOut DMEM
With Additives	High Glucose, Phenol Red
Without Additives	No Glutamine
Manufacturing Quality	cGMP for medical devices, 21 CFR Part 820 and ISO 13485
Product Line	KnockOut™
Quantity	500 mL
Shipping Condition	Room Temperature
Unit Size	Each
