Product information "M199 w: EBSS, w: stable Glutamine, w: 2.2 g/L NaHCO3"

The M199 was originally developed to assay the nutrient demand of embryonic chicken fibroblasts. But it works very well with cells from many different animal species. For example, it is used for vaccine production in virology. For long term cultures serum should be added.

Equivalent to: FG 0615 [more...](#)

Bicarbonate:	with Sodium Bicarbonate
Endotoxin Content:	Endotoxin Content unspecified
Glucose:	With Glucose
