To whom it may concern,

MANUFACTURER'S DECLARATION

We, ADRONA SIA, manufacturers of laboratory water purification equipment located at 209 Kalnciema Street, Riga, LV-1046, Latvia, herby confirm that

1. Siūloma prekė Our authorized dealer GRIDA is offering for Santaros hospital Integrity+ HPLC system (CB-2103) with Flow Point 3 which fully match tender 1567723 specifications:

3. Komponentai

1) Components included in system:

Combined pre-filter with 1 µm polypropylene filter and activated carbon
Polishing filters with identification system
UV lamp (185 nm UV lamp)
0.22 µm dispensing filter

8. Išpilstymo greitis

2) Ultrapure (grade 1) water bottling speed - 1,5 L/min

3) Parameters displayed on the screen:

Conductivity and resistivity of ultrapure water
TOC (Total Organic Carbon)

11. Ekrane rodomi parametrai

Temperature

Status indication

Automatic error messages

12. Vandens kokybės vienetai

Flow chart with all parameter readings

4) Water quality units µS/cm or MOhm*cm, can be set by the user

5) Flow point 3 remote dispenser will ensure access to ultra-pure water up to 3 m away from the water purification system

14. Nuotolinis dozatorius

15. Eksploatacinių medžiagų keitimas

6) All consumables can be replaced by the user without additional tools

7) The delivery package includes a 10" external primary filter kit (activated carbon, polyphosphate, polypropylene 1µm mechanical filter cartridges), which includes a water pressure gauge.

16. Papildomi reikalavimai pajungimui

Best regards,

Sales Manager
