

# foil apron

## non-sterile

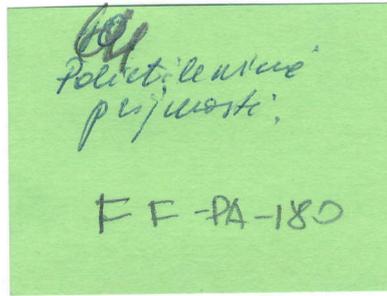

### features:

- made of polyethylene
- transparent
- thickness: 0,02 mm (20µm)
- single-use
- individual packaging: foil

### indication:

- used for the protection of user's clothing

ref.	size	bulk packaging
FF-PAK	71 x 116 cm	100 pcs
FF-PAK-180	71 x 180 cm	100 pcs

# foil gloves

## non-sterile

### features:

- made of polyethylene
- universal, suitable for right and left hand
- coarse surface and tear-resistant weld
- available in two sizes: M- female, L- male
- single-use

### indication:

- can be used in food preparation and in other type of contact with food

RF-M	M	100 pcs
RF-L	L	100 pcs

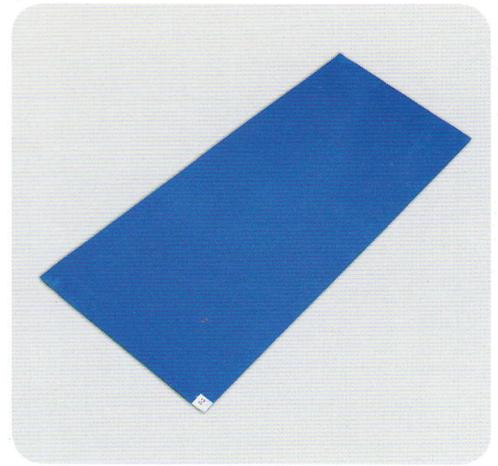

# entrance mats

## features:

- characterized by adhesive properties
- each layer has bacteriostatic coating
- material used for the production of mat foil layers: - low-density polyethylene resins
- resin (foil component) is made with the use of modern high-pressure technology, which allows excluding catalysts in the form of heavy metals from the production process. Thus the foil leaves do not contain detectable quantities of cadmium, chloride, sodium or lead. Acryl-based elastic adhesive substance is free of ingredients coming into reaction with metals. The top and bottom leaves are also made of polyolefin, they are not adhesive
- 30 thin, adhesive plastic sheets
- low mat profile: app. 2 mm thick
- the self-adhesive reverse layer prevents unwanted mat movement
- no need to clean the mat - as soon as the surface of the mat is contaminated, it should be torn off to uncover a new, clean layer
- small, numbered labels in the mat corner, which facilitate removal of subsequent layers

## indication:

- preventing spreading of contamination brought on shoe soles and wheelchairs to operating rooms

ref.	size	bulk packaging
M001	45 x 115 cm	10 pcs

# medical identification bracelets

## non-sterile

## features:

- durable bracelet coating characterized by high humidity resistance and resistance to the activity of soaps, hand disinfectants and other liquids used in hospitals
- flexible, delicate, very light and easy to put on
- high tensile strength and single use fastening resistant to accidental break

*76  
14*  
- lanolins, lempres  
- etoporus, te m'p'm'm  
- w'el'm'el'

## indication:

- used at healthcare centers to provide protection by means of proper identification of patients
