

Your partner in safety and quality

SAFETOUCH™

Safety Fistula Needle

SafeTouch™ AVF Needles

For a safe and successful treatment

Safety Features

- Pre-removal Activation
Immediate shielding of needle upon withdrawal from fistula
- Once locked, stays locked
- A secured locking is confirmed by an audible and tactile click
- Unique patented locking mechanism
- Reduced risk of needle stick injury (NSI) diminishes risk of cross-contamination for hepatitis, HIV, etc.

Product Features

- Ultra sharp and siliconized needle for easier, smoother penetration
- Ultra thin needle walls allow maximum blood flow
- Textured wings provide secure grip during needle manipulation
- Luer tapered for easier connection with all bloodlines
