TIP SHAPES

### 1 Proprietary Braid/Coil Construction

- Provides a balance of stability (braid section) and navigability (coil section)

### 2 TRUELUMEN® Technology

- Provides a consistent inner diameter throughout the length of the microcatheter
- In-line marker bands provide a consistent profile and enhanced visibility under fluoroscopy

PD.Nr.5

### 3 Accurate Tip Position:

- Shorter distal tip extending past the distal marker (as little as 0.5 mm<sup>1</sup>) provides more accurate representation of tip position under fluoroscopy.
