## Range of 3 Way Stop Cock with & without Extension

### Link™ 3 - Three Way Stopcock (Standard)

Provides multiple access ports during infusion and transfusion for standard non lipid IV fluids and other solutions. Also can be used during IBP monitoring. **gerai prisijungiantys prie kateterio.**  
Blue coloured standard tap.

### Link™ 3LR - Three Way Stopcock (LR)

Provides multiple access ports during infusion and transfusion for **lipid containing** IV fluids and other solutions.

### Link™ 3KLR - With click feel at every 45°

The new generation stop cock with click feel at every 45° rotation for correct feel of movement (TYVEK PACKED).

#### Features & Benefits :

- 360° tap rotation.
- Red and blue pegs/stubs for arterial and venous line identification.
- Pressure tested to 5 bars.
- Minimum priming volume & low dead space.
- Polycarbonate material.

#### Specifications
