

Revolutionizing Orthopedic Surgery

FiberWire®

FiberWire®

FiberWire suture is constructed of a multi-strand, long-chain ultra-high molecular weight polyethylene (UHMWPE) core with a braided jacket of polyester and UHMWPE that gives FiberWire superior strength, soft feel and abrasion resistance that is unequalled in orthopedic surgery. Suture breakage during knot tying is virtually eliminated, which is especially critical during arthroscopic procedures. FiberWire represents a major advancement in orthopedic surgery.
