

SKATER Drainage System

The SKATER Drainage System provides a complete portfolio of catheters and accessories for all-purpose, nephrostomy, biliary and centesis procedures.

SKATER All-Purpose and Nephrostomy Drainage Catheters

SKATER All-Purpose/Nephrostomy Drainage Catheters are suitable for percutaneous drainage of abscesses or fluid collections using the direct stick technique or kidneys using the seldinger technique.

Each Set Includes

- 1 SKATER catheter
- 1 Metal stiffening cannula
- 1 Removable pigtail straightener
- 1 Flexible stiffening cannula (Not available on 6F and 7F)
- 1 Locking system with snap-off tab (Not available on non-locking pigtail catheters)

17.

SKATER Introducer Sets

The SKATER Introducer Set provides easy, accurate and atraumatic placement of a .035"/.038" guidewire in non-vascular procedures. Embedded radiopaque marker enhances visualisation for accurate placement. 4F dilator/6F sheath assembly with locking stiffening cannula facilitates easy over-the-wire placement. Large end hole design of the sheath accepts both .018" and .035"/.038" guidewires simultaneously. Available with a stainless steel or nitinol .018" guidewire.

SKATER Introducer Sets for Introduction of .035" or .038" guidewire (Box of 5)	
CATALOGUE NO.	DESCRIPTION
651506000	4F dilator/6F x 18cm co-axial introducer, .018" x 80cm stainless steel access guidewire with radiopaque tip, 21G x 15cm trocar needle

TCD Drainage Catheters

The catheter is made of polyethylene. Applications:

TCD Catheter: drainage of cysts, abscesses, hematomas, pleural exudates, ascites, gall bladders, nephrostomies, pleuracentese and paracentesis.

TCD Drainage Catheter with safety string lock system: drainage of large cysts, gall bladders and nephrostomies.

Radiopaque Polyethylene – for excellent radiopacity; optimal wall thickness for configuration memory; optimal sized side holes along inner pigtail curve; with or without Safety String Lock System.
