800809	100	Low Retention, Rack Packed, Filtered, Sterile	Clear	96 pcs/rack, 50 racks/case

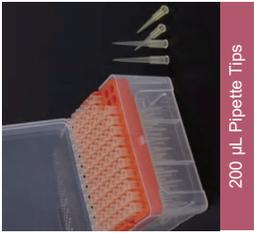

Features

- 100% virgin polypropylene
- Fully automated production lines
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- Universal fit
- Smooth surface to ensure accurate pipetting

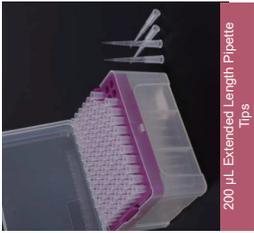

Applications

- Pipetting liquids
- Dispensing liquids
- Mixing liquids
- Filling plates and reaction vessels
- Filling gels for electrophoresis
- Phase extraction and removal of supernatants

Tecan Robotic Tips

Designed for Tecan Platform.
 Made of medical grade conductive polypropylene (PP), allowing capacitive liquid level detection.
 Filter or without are all optional.

Features

- High performance
 - Dispensing liquids
 - Fully automated production lines
 - Consistent pipetting accuracy and precision
 - DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
 - Compatibility:
- Series: **Tecan Freedom EVO, Cavro workstation**

TCN MCA Pipette Tips

Imported polypropylene (PP) material, stable chemical properties, excellent chemical corrosion resistance. CellPro has independent mold design capabilities and mature injection molding technology to ensure good air tightness and adaptability of products. All single-use tips are designed, manufactured, tested and certified to guarantee reliable quality, and consistency in pipetting accuracy and precision helps you achieve the best results.

50µL TCN MCA Pipette Tips

200µL TCN MCA Pipette Tips

Applications

- Adapted to TECAN MCA automatic workstations
- Imported polypropylene (PP) material , high light transmission
- The inner wall is smooth, pipetting is precise, and the seal and compatibility are good
- ISO-8 Cleanroom Production
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free

Hamilton Robotic Tips

Designed for Hamilton Platform.
Made of medical grade conductive polypropylene (PP), allowing capacitive liquid level detection.
Filter or without are all optional.

Features

- High performance
- Dispensing liquids
- Fully automated production lines
- Consistent pipetting accuracy and precision
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- Compatibility:
models: **Microlab VANTAGE, Microlab STAR, Microlab NIMBUS, Microlab Prep**
pipettes: **1000µL channel, 96 utlprobe Head**

Beckman Robotic Tips

- Imported polypropylene (PP), USP Class VI standards
- Smooth inner wall, reduce liquid residue, ensure the accuracy of liquid suction
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- Ultra-grinding & molding technology
- Withstand temperature ranging from -80°C to 121°C, stable performance under high temperature and high pressure
- Extra thin-wall design increase product flexibility and improve heat transfer efficiency

Features

- High performance
- Dispensing liquids
- Fully automated production lines
- Consistent pipetting accuracy and precision
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free

Robotic Reservoirs

CellPro offers single-well and multiple-well reagent reservoirs which are available in multiple formats for both manual and automated environments. All reservoirs are compatible with most automation workstations. Reagent reservoirs are manufactured with polypropylene for excellent chemical resistance.

Features

- DNase/RNase-free
- Low heavy metals content
- Good chemical compatibility
- Comply with standard ANSI/SBS
- Can be stored at temperatures as low as -80°C

Application

Fit 8-channel or 12-channel pipette or 8-channel, 12-channel, 96-channel and 384-channel automation workstations.

P / N	Wells	Channels	Type	Sterile	Configuration
819001	Multi	8-Channel Trough	Low Profile	No	5 pcs/pack, 10 packs/case
819002	Multi	12-Channel Trough	Low Profile	No	5 pcs/pack, 10 packs/case
819003	Single	96-Bottom Trough	Low Profile	No	5 pcs/pack, 10 packs/case
819004	Single	96-Bottom Trough	High Profile	No	5 pcs/pack, 10 packs/case
819005	Single	384-Bottom Trough	Low Profile	No	5 pcs/pack, 10 packs/case
819016	Multi	4-Channel Trough	Low Profile	No	5 pcs/pack, 10 packs/case
819017	Single	1-Bottom Trough	Low Profile	Yes	1 pot/pack, 150 packs/case
819018	Single	1-Bottom Trough	Low Profile	No	5 pcs/pack, 10 packs/case

Reagent Reservoirs

Disposable reagent reservoirs are manufactured with polystyrene and fit all multichannel pipettors. Four pour-off corners and a sharp v-bottom to ensure maximum sample retrieval.

Features

- Extra-wide base adds rigidity and stability to reservoir, helping to avoid spills
- Pour-off spouts on all four corners reduce spillage when pouring reagents out of reservoir
- Graduations on inside wall enable quick measurement of remaining liquid
- 25 mL, 65 mL divided reservoir allows the pipetting of two different reagents

P/N	Capacity	Sterile	Configuration
819008	65 mL	No	100 pcs/case, Bulk
819009	65 mL	Yes	1 pc/box, 100 packs/case, Individually Wrapped, Sterile

819015	100 mL	Yes	1 pc/box, 100 packs/case, Individually Wrapped, Sterile

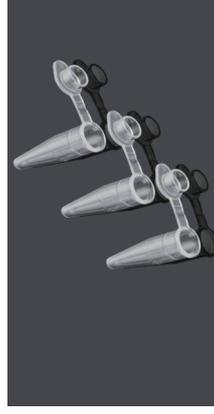

PCR Tubes and Plates

Features

- Made of medical grade imported polypropylene (PP)
- Qualified injection molding technology and independent mold design technology
- Thin wall and uniform in thickness
- ISO-8 Cleanroom Production, DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free

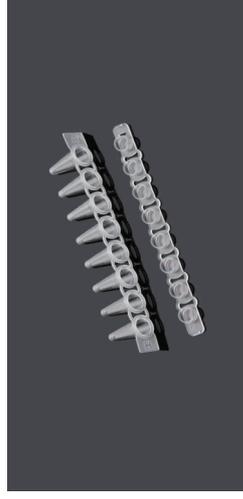

PCR Tubes with Attached Flat Cap

Made of virgin polypropylene and designed for precise fit in heat blocks to optimize heat transfer. The tubes are cleanroom produced, ensuring that they are free from contaminants that could affect experimental results.

P/N	Capacity / μ L	Closure Type	Color	Configuration
802001	200	Flat Cap	Clear	1000 tubes/box, 10 boxes/case
802051	500	Flat Cap	Clear	500 tubes/box, 10 boxes/case

PCR 8-strip Tubes and Caps

Features

- Made of medical grade imported polypropylene (PP)

96-Well PCR Plates

96-Well, flat top PCR microplate is designed to fit standard 96 well blocks. Ultra-thin and consistent wall thickness allows precise thermal transfer for optimum results. Can be sealed with 8/12 strip caps, or sealing film.

Features

- Suitable for 0.1 mL/0.2 mL thermal cycler blocks
- Application: PCR, qPCR/Real-Time PCR

96-Well PCR plates

384-Well PCR Plates

384-Well PCR Plates are compatible with most 384-module PCR instruments and sequencing instruments, are suitable for high-throughput automated systems, and have notch at the A24&P24 position.

Features

- Fully skirt design suitable for automated operation
- Ideal for high-throughput systems
- Material with uniform, thin walls maximize consistent heat transfer to and from the reaction samples
- Fits standard 384-well modules and is compatible with most thermal cycler systems
- 40 μ L maximum well capacity, 25 μ L maximum working capacity
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- A raised rim around the wells enables secure sealing with film and safeguards against evaporation

Optical Adhesive Films

PCR Sealing Film reduces the chance of well-to-well contamination and sample evaporation when applied to a microplate. Prevent Loss of Precious Samples.

Use this optically-clear adhesive film to seal the samples into the wells of a microplate. This will reduce the possibility of cross contamination between sample wells and help ensure consistent Real-Time PCR data. For Research Use Only. Not for use in diagnostic procedures.

Easy to Use.

Simply peel the backing away from the adhesive film and apply firmly across the top of your microplate. Stack microplates and read samples as you would normally except with less chance of sample contamination. Designed to fit on 96-well and 384-well plates.

Features

- Pressure-sensitive adhesive provides a tight seal over every well
- Will not interfere with sample reading
- Press-N-Seal: Align properly to the plate, then press to seal
- Easy to apply-will not stick to your glove

P/N	Description	Configuration
802021B02	Optical, ABI, Pressure sensitive	100 pcs/pack
802021B03	Optical, Easily simply, Pressure sensitive	100 pcs/pack

Adhesive PCR Plate Films

The transparent adhesive film firmly seals the sample in the wells, reducing sample leakage, evaporation, and contamination between wells.

The adhesive film is firmly adhered to the well plate by removing the adhesive film backing and grasping the sides to align and secure the adhesive film to the well plate. Once sealed, it can be safely stacked without worrying about contamination.

Features

- Self-adhesive, manual lamination
- Both sides can be peeled, easy to operate
- Easy to remove, no residue
- No reaction with experimental samples
- High transparency and good sealing

Adhesive PCR plate seals

P/N	Description	Configuration
802021E01	Adhesive Transparent Sealing Film, Clear, 142x80 mm	100 pcs/pack

Sealing Foils

Features

- Good alcohol resistance and good chemical corrosion resistance
- Easy to tear while ensuring sealing performance
- Withstands a wide temperature range and has been tested by extreme temperature tests and long-term tests
- The sealing surface is clean and tidy without residue
- Strict batch management ensures product quality

Centrifuge Tubes

Conical Sterile Polypropylene Centrifuge Tubes are premium, high-quality conical tubes that are environmentally friendly, allow for increased traceability with the largest writing area on the market. Centrifuge tubes are made from high-purity resins and molded using our state-of-the-art processes. Centrifuge tubes is a safer alternative to glass without sacrificing accuracy. Centrifuge tubes feature are black-printed graduations and a large white marking spot.

Sterile, DNase/RNase-free, Nonpyrogenic.

15 mL & 50 mL Centrifuge Tubes

- Black printed graduations with a large white marking spot
- Maximum RCF is 12,000 xg
- Sterile, nonpyrogenic and DNase/RNase-free
- Convenient and safe cell culture applications
- Sample preparation in microbiology and molecular biology labs
- Storage of samples and solution with larger volumes
- Preparation of master mixes and buffers

P / N	Capacity	Tube Color	Description	Configuration

801183	2.0 mL	Low Retention, Bulk	Clear	500 tubes/pack, 10 packs/case

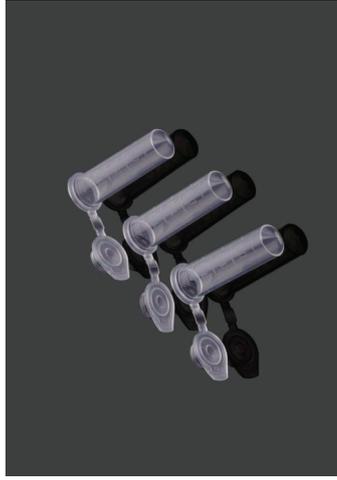

Low Retention Micro Centrifuge Tubes

Low Retention centrifuge tubes are preferably made of virgin PP, a special process for centrifuge tubes that significantly improves sample storage efficiency and higher recovery rates. No surface coating to reduce interference with the sample. Highly transparent, the tubes come with a scale and frosted writing area for easy marking and observation of the liquid volume.

Features

- Low DNA/Protein-binding
- Good sealing, repeated opening and closing of the cap, greater reduction in evaporation
- Sterile
- DNase/RNase-free, Non PCR inhibitors, Non pyrogen
- Temperature Range: -80°C to 121°C
- Will withstand up to 14,000 xg RCF

Applications

Low Protein-binding Micro Centrifuge Tube: preparation and storage of proteins, peptides or antibodies, enzymatic reactions, storage of viruses to prevent reduction of virus titres, storage of cell suspensions.

Low DNA-binding Micro Centrifuge Tube: DNA solution dilution, DNA solution preservation, extraction and purification process of DNA sample.

P / N	Capacity	Description	Sterile	Configuration
801167	1.5 mL	Low DNA-binding, Clear	Yes	10 pcs/bag, 10 bags/pack, 10 packs/case
801168	1.5 mL	Low Protein-binding, Clear	Yes	10 pcs/bag, 10 bags/pack, 10 packs/case
801167	2.0 mL	Low DNA-binding, Clear	Yes	10 pcs/bag, 10 bags/pack, 10 packs/case
801168	2.0 mL	Low Protein-binding, Clear	Yes	10 pcs/bag, 10 bags/pack, 10 packs/case

Safe-Lock Micro Centrifuge Tubes

Imported high-purity polypropylene (PP) raw materials, in line with the USP Class-IV standard, does not contain heavy metal ions.

One-piece tube and cover, stable connection, can be repeatedly opened and closed without breakage. With safe-lock design, good sealing, effectively prevents the bursting of lid. The tube has a frosted writing surface, convenient for sample marking. High transparency for clear and easy observation.

Features

- Withstand speeds up to 14,000 xg RCF
- DNase/RNase-free, Non pyrogen
- With safe-lock design
- Can be operated with one hand for efficiency

Applications

Routine as well as demanding laboratory uses, including centrifugation, heating, incubation, freezing or sample storage.

P / N	Capacity	Sterile	Radiation resistance	Configuration
801191	1.5 mL	No	No	500 pcs/pack, 10 packs/case
801192	1.5 mL	No	Yes	500 pcs/pack, 10 packs/case
801196	1.5 mL	Yes	Yes	500 pcs/pack, 10 packs/case
801601	5 mL	No	No	100 pcs/pack, 10 packs/case

Screw Cap Micro Tubes

- Screw cap tubes are available in a variety of colors with a conical or self-standing bottom
- Colored-cap versions are available
- Manufactured from high-clarity, ultra-pure polypropylene
- Suitable for a wide range of temperatures-from -80 °C to 120°C.

- Note: not suitable for immersion in liquid nitrogen
- Ideal for: boiling applications
 - Certified free of detectable RNase, DNase, DNA, PCR inhibitors, and tested pyrogen-free
 - Maximum RCF is 20,000 xg

Optional Colors for Screw Caps

various colors of the cap are available for the free combination and matching

Cryogenic Vials

Imported polypropylene (PP) material, complies with USP Class-VI standard
 Temperature range: -196°C~121°C, repeatable freeze-thaw
 Large white writing area, clearer printing of scale lines
 Ergonomic, smooth internal contours and residue-free sampling
 DNase-free, RNase-free, Pyrogen/Endotoxin-free
 High transparency for clear and easy observation.

Features

- High temperature and pressure resistance, can be repeatedly frozen and thawed
- Strong sealing to meet the safety of samples and experiments
- External/Internal rotation, various sizes available

Applications

Routine as well as demanding laboratory uses, including centrifugation, heating, incubation, freezing or sample storage.

■ Cryogenic vials (External-Thread)

Has a screw cap with external threads to reduce the risk of sealability

External-Thread				
P/N	Capacity	Tube Color	Cap Color	Configuration

8240302	2 mL	Black	48 pcs/rack, 50 racks/ case

Cell Culture Products

Cell culture series are commonly applied in cell culture laboratories. CellPro has plasma surface treatment technology, more conducive to cell adherent growth. It is widely used in basic research of life science, cancer research, virus detection and diagnosis, genetic engineering, vaccine development and production and other fields.

■ Cell Culture Plates

Clear Multiwell Plate is comprised of clear TC-treated polystyrene. Flat bottom, with low evaporation lid, sterile. Convenient, peel-open medical-style packaging for individual product prevention.

Features

- Standard tissue culture (TC) treated
- Crystal-grade virgin polystyrene
- Flat well bottom and stackable
- Raised well rims to lower the risk of cross contamination
- Sterilized by gamma irradiation and non-pyrogenic
- Excellent optical effect
- Alphanumerical codes for well identification
- Round Well Styles with vented lids for gas exchange
- Recessed areas around wells act as a water reservoir to reduce evaporation
- Lids with notched corners for easy orientation

P/N	Capacity/well	Well count	Culture Area	Configuration
803006	2.9 mL	6	9.5 cm ²	1 pcpack, 50 packs/case
803012	1.14 mL	12	3.8 cm ²	1 pcpack, 50 packs/case
803024	0.57 mL	24	1.9 cm ²	1 pcpack, 50 packs/case
803048	0.285 mL	48	0.9 cm ²	1 pcpack, 50 packs/case
80306P01	0.2 mL	96	0.32 cm ²	1 pcpack, 50 packs/case

96-Well Round (U) Bottom Cell Culture Plates

The cell culture plates are made of polystyrene, a transparent polymer material, and the plates are treated with CellPro's unique LACsurface treatment process, which forms a surface that inhibits cell adhesion and is non-toxic to cells, does not affect the growth of suspended cells, minimizes cell apposition and differentiation, reduces protein adhesion and enzyme activation.

Features

- Effectively reduces cell apposition and controls the direction of cell differentiation
- Round bottom with lid to reduce contamination and evaporation
- Non-slip design on the side, easy to hold
- Temperature range: -20°C-60°C
- DNase/RNase free
- Sterile, non-pyrogenic, non-cytotoxic

Applications

Suspension cell culture, walled cell 3D culture, cell induced differentiation

P/N	Working Volume	Description	Sterile	Configuration
C803096B-P01	0.2 mL	LACsurface Ultra-low Retention	Yes	1 pcpack, 50 packs/case
803096B-P01	0.2 mL	TC treated	Yes	1 pcpack, 50 packs/case

Cell Culture Flasks

Flasks are the preferred vessel for long term cultivation or large-scale expansion of cells, providing the best protection against contamination.

The ergonomic design with angled neck and wide opening allows easy access to the growth surface by pipettes or cell scrapers.

Workflow safety is combined with facilitated and ergonomic access to your cells in the Cell Culture Flasks. They are available in three sizes: T25, T75 and T175 with TC treated.

Vented caps with innovative air filter technology or plug-seal caps with arrested position to prevent undesired closing are the two closing options.

Features

- Direct surface identification on flask and cap
- Ergonomic design with a 1/3 turn to open and close the cap
- Low profile to maximize incubator space
- Volume graduations printed and molded on both sides
- Slightly angled side walls for complete viewing under a microscope
- Sterilized by gamma irradiation and nonpyrogenic
- Expansion and culture of adherent and suspension cells on TC treated or on non-treated polystyrene
- Performance of cell-based assays and microscopic analysis

P/N	Culture Area	Cap Style	Capacity	Configuration
803025	25 cm ²	Vented	50 mL	12 pcs/bag, 25 bags/case
803026	25 cm ²	Sealed	50 mL	12 pcs/bag, 25 bags/case
803075	75 cm ²	Vented	175 mL	5 pcs/bag, 18 bags/case
803076	75 cm ²	Sealed	175 mL	5 pcs/bag, 18 bags/case
803175	175 cm ²	Vented	550 mL	5 pcs/bag, 10 bags/case
803176	175 cm ²	Sealed	550 mL	5 pcs/bag, 10 bags/case

U-Shaped Cell Culture Flask

U-shaped design, improving usability while maintaining the same environment for cell growth.

Easier grip and for better access when removing or tightening the cap.

New ergonomic shape also reduces the number of corners.

Making it possible to efficiently reach the cell lawn with a cell scraper, whilst still providing optimal access with a pipette.

Features

- Clear virgin polystyrene
- Vented or Sealed cap
- Graduation on the side
- TC surface treatment
- DNase/RNase-free, non-pyrogenic
- Non-cytotoxic
- Stackable
- Sterile

P/N	Culture Area	Cap Color	Cap Style	Capacity	Configuration
813075	75 cm ²	Red	Vented	15-22.5 mL	5 pcs/bag, 18 bags/case
813150	150 cm ²	Red	Vented	30-45 mL	5 pcs/bag, 10 bags/case
813076	75 cm ²	Red	Sealed	15-22.5 mL	5 pcs/bag, 18 bags/case
813151	150 cm ²	Red	Sealed	30-45 mL	5 pcs/bag, 10 bags/case

* For Research Use Only

Cell Culture Dishes

Cell Culture dishes are available in 35 mm to 150 mm formats with TC treated surfaces

Features

- CellPro cell culture dishes were designed with a focus on improved handling and stacking performance to ensure a new level of safe and carefree usage
- Combined with outstanding and sturdy stacking, our cell culture dishes are unparalleled in their ease of transport and handling, safety and convenience
- Expansion and culture of adherent and suspension cells on TC treated
- Performance of cell-based assays and microscopic analysis

P/N	Culture Area	Surface Treatment	Configuration
803035	8 cm ²	TC Treated	20 pcs/pack, 25 packs/case
803060	21 cm ²	TC Treated	20 pcs/pack, 25 packs/case
803100	55 cm ²	TC Treated	10 pcs/pack, 30 packs/case
803035B	8 cm ²	TC Treated	20 pcs/pack, 25 packs/case
803060B	21 cm ²	TC Treated	20 pcs/pack, 25 packs/case
803100B	55 cm ²	TC Treated	10 pcs/pack, 30 packs/case
8030150B	145 cm ²	TC Treated	10 pcs/pack, 8 packs/case

Serological Pipettes

Serological Pipettes is a great choice for daily lab work.

Serological Pipettes may be used to aspirate and dispense liquids within a volume range of 0.1 mL to 50 mL. Bold, clear bidirectional graduations make it easy-to-read fluid volumes and dispensing amounts. Color-coding for easy identification of pipet sizes.

With precise and easy-to-read graduations, they are designed to quickly aspirate and dispense liquids when using mechanical or electronic pipette controllers.

Features

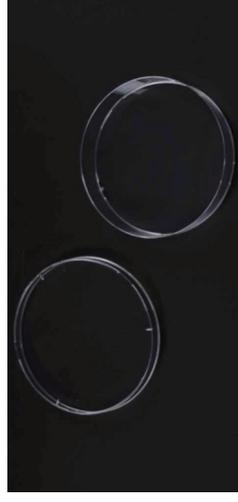

- Material: Ultra clear, 100% virgin polystyrene for maximum clarity
- Contaminant Free: RNase/DNase free, Non-Pyrogenic
- Sterility: E-Beam irradiation
- Individually wrapped pipets for reliable sterility
- Transfer of liquids
- Mixing suspensions
- Combining reagents and chemical solutions
- Transferring cells for empirical analysis or expansion
- Layering reagents for creating higher density gradients

P/N	Capacity	Code Color	Configuration
C804001	1 mL	Yellow	50 pcs/pack, 20 packs/case
C804002	2 mL	Green	50 pcs/pack, 20 packs/case
C804005	5 mL	Blue	50 pcs/pack, 4 packs/case
C804010	10 mL	Orange	50 pcs/pack, 4 packs/case
C804025	25 mL	Red	50 pcs/pack, 4 packs/case
C804050	50 mL	Violet	25 pcs/pack, 4 packs/case

Petri Dish

Petri dishes are one of the most important products in a bacteriological laboratory. The dishes are in vented design and manufactured in high capacity automated production lines.

Environmental and Water Testing, Food and Beverage Testing, Pharmaceutical Quality Control and Life Sciences. General laboratory product for bacteriology to be used by qualified personnel in a laboratory environment.

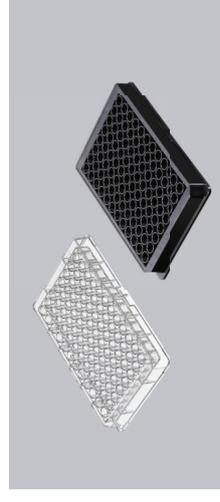

Features

- Easy stacking
- Vented for gas exchange
- Manufactured from high-grade polystyrene
- Sterile
- For single use only
- Free of DNase /RNase, Non-pyrogenic, Non-cytotoxic

*For Research Use Only.

P/N	Specification	Configuration

816110P02	90 mm	10 pcs/pack, 50 packs/case

96-well UV-Transparent Microplate

UV-transmitted, stable at 260 and 280 nm

P/N	Total Volume	Working Volume	Type	Configuration
807010P01	360 µL	75-200 µL	Clear	1 pcs/pack, 50 packs/case
807010	360 µL	75-200 µL	Clear	5 pcs/pack, 10 packs/case
807001P01	360 µL	75-200 µL	Black with clear bottom	1 pcs/pack, 50 packs/case
807001	360 µL	75-200 µL	Black with clear bottom	5 pcs/pack, 10 packs/case

ELISA Microplates

All ELISA microplates are made out of high-quality virgin polystyrene (PS). The material is highly transparent and therefore ideally suited for optical measurements. The quality of our immunological products is constantly controlled in our quality assurance laboratory by means of ELISA.

P/N	Total Volume	Working Volume	Type	Configuration
805001/P01	250 µL	75-200 µL	Clear, Undetachable	5 pcs/pack, 20 packs/case
805002C-P01	300 µL	75-200 µL	Clear, Detachable	5 pcs/pack, 20 packs/case
805004	300 µL	75-200 µL	Clear, Detachable	5 pcs/pack, 20 packs/case

96 Well Microplates

Microplates made with high quality black polystyrene ensure consistent and reliable results for experiments. The black microplates are specially optimized for use in automated equipment, microplate readers and liquid handling systems. The products can be used for quantitative and qualitative immunoassays, such as protein binding assays, fluorescence analysis and other experiments.

Features

- Medium/high binding power, high signal-to-noise ratio
- Reduce well-to-well cross-talk
- Have low background fluorescence and minimize light scattering
- Flat bottom plate, stackable and space-saving
- Non-slip sides for easy grip
- Certified binding uniformity/reproducibility
- DNase/RNase free, pyrogen free
- SBS-compliant microplate shape for use with standard instruments

P/N	Type	surface treatment	Well Bottom	Configuration
805005	Standard, With Cap	Medium Binding	Flat Bottom	25 pcs/box, 4 boxes/case
805003	Standard, With Cap	High Binding	Flat Bottom	25 pcs/box, 4 boxes/case

96-Well Deep Well Plates

Deep well plates are used for sample collection, processing and storage. The depth of wells is increased to enlarge the volume of each well. Polypropylene (PP) offers excellent chemical resistance and can withstand temperatures down to -80 °C.

Option: pierceable sealing films, aluminum-based, self-adhesive.

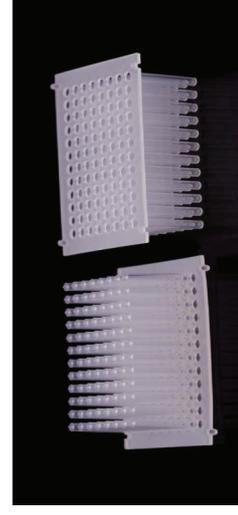

Features

- Nonpyrogenic and DNase-/RNase-free
- For Research Use Only. Not for use in diagnostic procedures

P/N	Capacity	Type	Configuration
802123	2.2 mL	96-well, V-bottom, Square Well	5 pcs/bag, 10 bags/case
802124	2.2 mL	96-well, U-bottom, Square Well	5 pcs/bag, 10 bags/case
802125	2.2 mL	96-well, U-bottom, Square Well, Skirted	5 pcs/bag, 10 bags/case

96-Well Deep Well Tip Combs

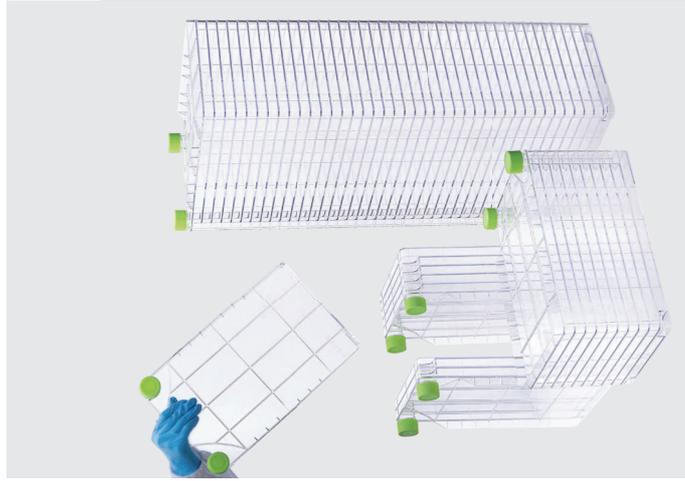

Tip combs are made of polypropylene (PP) and are ideal for magnetic particle processing because of their low binding affinity for biomolecules. Their special design enables excellent recovery of magnetic beads. For Research Use Only. Not for use in diagnostic procedures.

P/N	Capacity	Configuration
802121	2.2 mL	10 pcs/pack, 10 packs/case
802121/P01	2.2 mL	2 pcs/pack, 50 packs/case

Multi-layer Cell Culture Chambers

CellPro's multi-layer cell culture chambers are all made of USP VI medical-grade polystyrene raw materials and manufactured in a dedicated cleanroom of ISO Class 7. And at the same time, it utilized safe and mature production technology and technical quality control, with qualified and complete material certificates and verification documents. Its physical properties, chemical compatibility, extractables, biological safety, etc. are compliant with the Chinese Pharmacopoeia, ISO, USP and other series of standards, which are fully compliant with the strict requirements of biopharmaceuticals.

Features

- Layers of 1, 2, 5, 10, and 40 are available and can be easily scaled to amplify cultures
- ADsurface treatment increases cell adhesion and homogeneity, which is ideal for adherent cell culture
- Mature production process, no soldering particles
- Expandable up to 40 layers and compatible with manipulators, incubators, etc., for automation
- Stable and reliable supply capacity, consistent product performance
- Supports the use of a full range of accessories for aseptic filling, inoculation, replenishment and harvesting of cell cultures
- 0.22μm hydrophobic and breathable filter membrane cover, which facilitates gas exchange and ensures sterility
- Double-layer independent sterile packaging, non-pyrogenic, non-cytotoxic
- The multi-layer cell culture chambers is an ideal vessel for static culture of adherent cells, with growth curves consistent with those of cell flasks, allowing customers to quickly scale up their processes without having to adjust the culture method.
- 100% leak tested before leaving the factory

Features

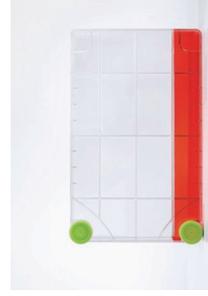

- Vaccine industry: New crown vaccine, oral inactivated polio vaccine, lyophilized live attenuated hepatitis A vaccine, etc.
- Cell and gene therapy: Viral vector systems including adenovirus, adeno-associated virus, and lentivirus, VERO, MOCK, HEK293, etc. to harvest high purity and high titer viral particles
- Stem cell field: HPC (hematopoietic progenitor cell) hematopoietic stem cells, plasmacytoid progenitor cells (hpMPC), lung stem cells and other plasmacytoid and multifunctional stem cells process amplification

P/N	Layer	Culture area (cm ²)	Surface Treatment	Sterile	Cap	Configuration
A808010	1-layer	636	AD surface	Yes	Each bag is equipped with 2 vented caps and 2 sealed caps	1 pcs/bag, 10 packs/box
A808020	2-layer	1272	AD surface	Yes		1 pcs/bag, 8 packs/box
A808050	5-layer	3180	AD surface	Yes		1 pcs/bag, 10 packs/box
A808100	10-layer	6360	AD surface	Yes		1 pcs/bag, 6 packs/box
A808400	40-layer	25440	AD surface	Yes		1 pcs/bag, 2 packs/box

Instructions for use

01 Open the lid and pour the medium and cells directly into the multi-layer cell culture chambers

02 Before the equilibration step, it is advisable to replace the vented cap with a sealed cap to reduce contamination risk. Equilibrate by placing the multi-layer cell culture chamber its side (side facing the inlet/scale)

03 Rotate the multi-layer cell culture chambers 90 degrees so that the inlet is up. Medium will be dispensed in equal amounts to each chamber

04 Carefully tilt the multi-layer cell culture chambers into a horizontal position, holding the sides of the system, not the top edge

05 Keep horizontal during incubation

06 Unscrew the vented cap and pour the Liquid directly into the reservoir

Erlenmeyer Flasks

The body of bottle is made of PC or PETG material, and its unique triangular shape design allows pipettes or cell scrapers to reach the corners of the bottle, making cell culture operations easier. The cap is made of high-strength PP material, and the vented cap has a hydrophobic membrane on top of the cap.

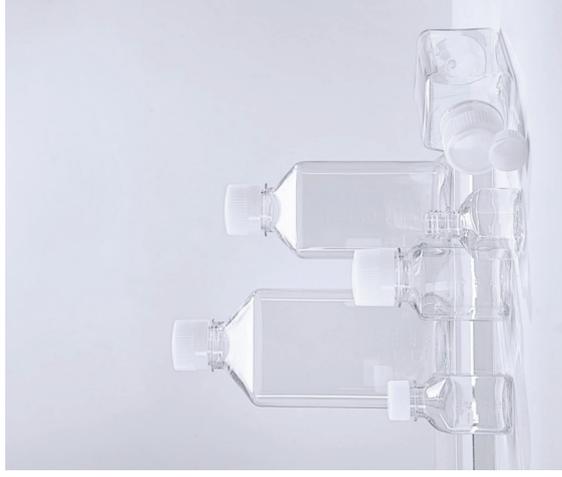

Features

- Flat-bottom save preparation time and avoid cross contamination risk
- Precise scale marks for easy observing
- The vented cap ensures the flow of gas, and at the same time, the breathable and impermeable characteristics ensure that the culture medium does not leak
- Irradiation sterilization
- Cleanroom Production, DNase/RNase-free
- The bottom baffle is designed to make the culture medium more uniform
- Capacity Specification: 125mL - 250mL - 500mL - 1L - 2L - 3L - 5L
- Product Type: Flat-bottom, baffle

P/N	Capacity	Material	Bottom	Cap Type	Configuration
822010	125mL	PC	Flat	Vented	1 per/pack, 50 packs/case
822020	250mL	PC	Flat	Vented	1 per/pack, 50 packs/case
822030	500mL	PC	Flat	Vented	1 per/pack, 25 packs/case
822040	1L	PC	Flat	Vented	1 per/pack, 20 packs/case
822050	2L	PC	Flat	Vented	1 per/pack, 6 packs/case
822060	3L	PC	Flat	Vented	1 per/pack, 4 packs/case
822070	5L	PC	Flat	Vented	1 per/pack, 4 packs/case
822110	125mL	PC	Baffle	Vented	1 per/pack, 50 packs/case
822120	250mL	PC	Baffle	Vented	1 per/pack, 50 packs/case
822130	500mL	PC	Baffle	Vented	1 per/pack, 25 packs/case
822140	1L	PC	Baffle	Vented	1 per/pack, 20 packs/case
822150	2L	PC	Baffle	Vented	1 per/pack, 6 packs/case
822160	3L	PC	Baffle	Vented	1 per/pack, 4 packs/case

Media Storage Bottles

Media storage bottles are ideal for storing and transporting biological and chemical reagents, and can maintain the integrity and purity of its components, which also provides safe and reliable storage of media, serum, buffer solution, and more in research applications.

Features

- Polyethylene terephthalate (PET) on the bottle and HDPE on the cap are compliant with USP-Class VI
- PET material, light weight, crack resistance, high transparency, safe and durable
- The square bottle design is easy to hold and handle
- The torticollis bottleneck makes pipetting and pouring safer and easier
- Various specifications to meet different capacity needs, convenient storage
- Clear and precise molded scale for accurate observation
- The inner surface of bottle wall is smooth, which minimizes residue
- Sterilized by irradiation (SAL) of 10^{-6} , non-cytotoxic, non-hemolytic, non-pyrogenic
- One-time molding to ensure tightness, strict leak testing to avoid contamination
- Specifications : 30mL, 60mL, 125mL, 250mL, 500mL, 1000mL
- Type : Square / Torticollis

* Note: The product is packed in a shrink film tray, and the tray is wrapped in a double-layer plastic bag and placed in the main box.

P/N	Capacity	Material	Form	Sterile	Configuration
8180030	30mL	PET	Square	Yes	40 pcs/pallet, 280 pcs /case
8180060	60mL	PET	Square	Yes	40 pcs/pallet, 200 pcs /case
8180125	125mL	PET	Square	Yes	24 pcs/pallet, 96 pcs /case
8180250	250mL	PET	Square	Yes	30 pcs/pallet, 60 pcs /case
8180500	500mL	PET	Square	Yes	20 pcs/pallet, 40 pcs /case
8181000	1000mL	PET	Square	Yes	12 pcs/pallet, 24 pcs /case
817010	500mL	PET	Torticollis	Yes	10 pcs/pallet, 20 pcs /case

Easy Grip Storage Bottles

Easy grip storage bottles are ideal for safe and reliable storage of media, buffer waves, and other water-soluble waves, and can also be used in conjunction with a vacuum filtration system and for aseptic storage of samples after vacuum filtration.

Features

- The bottle body is polystyrene (PS) and the cap is HDPE, all of which meet USP-Class VI standards
- Can be used with other brands of vacuum filtration systems with a neck size of 45mm
- Easy grip storage bottle has easy-grip sides for easy handling and ergonomics
- Various specifications to meet different capacity needs, convenient storage
- Clear and precise molded scale for accurate observation
- Aseptic preservation of samples after vacuum filtration
- Sterilized by irradiation (SAL) of 10^{-6} , non-cytotoxic, non-hemolytic, non-pyrogenic
- Specification: 150mL, 250mL, 500mL, 1000mL

P/N	Capacity	Material	Form	Sterile	Configuration
821010	150mL	PC	Easy to grip	Yes	1 pcs/package, 24 pcs/case
821020	250mL	PC	Easy to grip	Yes	1 pcs/package, 24 pcs/case
821030	500mL	PC	Easy to grip	Yes	1 pcs/package, 24 pcs/case
821040	1000mL	PC	Easy to grip	Yes	1 pcs/package, 24 pcs/case

Roller Bottles

It is mainly used in laboratory cell research and industrial production of biological products, including recombinant proteins, monoclonal antibodies, viral vaccines, cell secretion, etc.

Features

- Bottle: Polystyrene (PS), Cap: High Density Polyethylene (HDPE), both compliant with USP Class VI compliant
- Smooth surface, 850 cm² industry standard growing area
- TC surface treatment, achieve optimal cell adhesion performance
- One-piece, seamless construction with printed scale
- The vertical extension of surface helps to empty and reduce product carryover
- Sterilized by irradiation (SAL) 10^{-6} , DNase/RNase-free, non-pyrogenic, non-cytotoxic
- Suitable for automation and matches conventional roller bottle instruments

P/N	Culture Area	Surface Type	Surface Treatment	Cap	Sterile	Configuration
814010	850cm ²	Smooth	TC	Sealed	Yes	1 pcs/package, 12 pcs/case

Centrifuge Bottles

CellPro Biotechnology provides safe, convenient and different capacity centrifuge bottles, which are suitable for isolating and harvesting large volumes of cells, supernatants, bacteria, yeast and tissue samples, etc. And it can meet the requirements of bioanalysis and widely used in life science fields and clinical experiments.

Material: Polypropylene (PP) for bottle body, high-density polyethylene (HDPE) for cap cover, all in accordance with USP Class-VI Standards

Features

- Precise molded scale for easy observing of sample capacity
- Screw sealed cap, stable to ensure the security of user's use process
- Conical design of tube body and high transparency ensure that sample or precipitate is clearly visible
- Dimensionally accurate and adaptable to various centrifuge rotors
- Irradiation sterilization, DNase/RNase-free, non-pyrogenic, non-cytotoxic
- Temperature range: -80°C ~120°C
- Suitable for large-capacity centrifugation, maximum centrifugal force 6000xg

P/N	Capacity	Tube Type	Sterile	Packing	Configuration
806020	500mL	Conical	Yes	Bulk	6 pcs/package, 36 pcs/case
806010	250mL	Conical	Yes	Bulk	6 pcs/package, 102 pcs/case
