OCULFIT Orbital Implant

Brand name	OCULFIT							
References	6316-POI	6326-POI	6327-POI	8702-POI	6317-POI	8703-POI	6322-POI	8704-POI
Sphere diameter	14 mm	16 mm	18 mm	19 mm	20 mm	21 mm	22 mm	23 mm
Description and Indications	<p>OCULFIT orbital implants are spherical implants designed to be implanted after an enucleation or evisceration of the eyeball.</p> <p>Manufactured using high density porous polyethylene, (HDPE) a material tested with excellent biocompatibility results. Pagamintas iš didelio tankio akytojo polietileno.</p> <p>OCULFIT orbital implants have a smooth surface, which reduces the possibility of extruding the implant, four suture holes, to secure the device with ease, and a densely porous posterior surface, that facilitates integration and minimizes the risk of long-term exposure.</p>							
Material	High density porous polyethylene.							
Sterilization method	Ethylene Oxide (ETO). Sterilizavimo būdas Etileno oksidas (ETO)							
Supply	Sterile, single container. The devices are accompanied by an insertion accessory that facilitates their implantation, avoiding the adhesion of the tissues in its path.							
Shelf-life	5 years Galiojimo laikas 5 metai. Galiojimo laikas pažymėtas ant pakuotės							

PERFORATED CONFORMER

THE PERFORATED CONFORMER IS RECOMMENDED TO BE PLACED IMMEDIATELY AFTER THE SURGICAL PROCEDURE.

Brand name	AJL PERFORATED CONFORMER
