

Yale

Increase the security of your doors with the patented range of 6-pin brass inserts which provide a high level of security thanks to their high resistance to pulling, drilling, anti-bumping and pre-snap.

Inserts available in the following versions: double-sided with a safe clutch function, with a knob and half insert. Uniform insert sets also available. Wide range of finishes: black, brass and satin.

#### Safeguard:

- 6-valve Euro profile insert with safety clutch function as standard
- Resistant to picking, drilling, bumping and tearing out the cylinder
- 5 slotted keys included
- Key duplication code card
- Suitable for all types of doors
- 5 year warranty
- [Standard insert kits](#) available

#### Compliant with PN-EN 1303:2015-7 standard, classification as follows:

- Category of use - 1
- Durability - 6
- Door weight - 0
- Fire resistance - B
- Security - 0
- Corrosion and temperature resistance - C
- Key related security - 6
- Attack Resistance - D

#### Yale insert maintenance:

Yale recommends regular lubrication of Yale inserts to ensure continued trouble-free performance and operation.

We recommend using a PTFE-based lubricant for this purpose. A small amount of lubricant should be applied to the key and then inserted into the cylinder.

Turn the key a few times to distribute the lubricant.

Remove the key from the lock and wipe off any remaining lubricant to ensure it does not transfer to other items.
