# Pharmaceutical glass to meet all your requirements

Gerresheimer is your partner for pharmaceutical glass – around the globe.

As a leading packaging specialist we produce what our customers want: **Quality products with maximum reliability.**

- **For every need and in line with your requirements**

We offer all the common glass containers for pharmaceutical use: Syrup bottles, shaped bottles, dropper bottles, tablet jars, wide-mouth jars, injection and transfusion bottles, cream pots and technical/chemical glassware. All products are manufactured in accordance with the latest defect evaluation lists, the German Pharmacological Manual (DAB) and the applicable European Directives.

- **A wide variety of glass types, colours and sizes**

We develop products to meet all your requirements: In the glass types I to III, in amber, flint and coloured, with content volume ranging from 5 to 3000 ml.

|                 |  |                           |
|-----------------|--|---------------------------|
| <b>Type I</b>   | Borosilicate glass with maximum possible chemical resistance | Flint                     |
| <b>Type II</b>  | Soda-silicate glass with special inner surface treatment     | Flint and amber           |
| <b>Type III</b> | Soda-silicate glass  | Flint, amber and coloured |

- **Individual finishing methods**

Every conceivable finishing variant is possible in the bottle or jar type chosen by you: from printing through to coating, etching and plastification.

- **All possible packaging types**

We can deliver your products in tray-packs, safe packs or industrial packaging: the choice is yours.

- **State-of-the-art technical standards and a comprehensive quality guarantee**

With development based exclusively on Computer-Aided Design (CAD) and production on Computer Integrated Manufacturing (CAM), a high level of freedom from germs and particles is guaranteed particularly through the use of clean-room technology. The entire work process is registered in accordance with DIN EN ISO 9001 and DIN EN ISO 46001 and licensed by the FDA.

- **All-inclusive and complete system advice**

Our product range comprises all the neck types commonly used in the worldwide market and fitting the closure and caps of many manufacturers. Mediation in the choice of suppliers is a matter of course for us.
