

Technical Data Sheet For Adhesive Surgical Drape

1.Product Name

Adhesive Surgical Drape 300x175cm (REF:YT-V300175)

2. Product Content

Product Drawing	Item	Material	Size	Absorption capacity	Piece
	Adhesive Surgical Drape	30gsmPP+30gsmPE, with adhesive tape 5x60cm 1pc, 5x20cm 2pcs	300x175cm	430% (ISO 9073-6)	1

3.General information

Single-use sterile surgical drapes are sterile barriers designed to isolate the surgical site and maintain a sterile field during procedures, preventing contamination and reducing the risk of surgical site infections. They create a barrier between the patient's skin, equipment, and the surgical team, minimizing the chance of microbial transfer.

Adhesive parts (for drapes with adhesive) covered by siliconized release paper, glue made from hypoallergenic material, so has good adhesion, holds even in a humid environment and is easily removed after surgery, without damaging the patient's skin.

Product is single packed in strong sealed pouch.

Packaging has a label with a product description in English, Lithuanian, Latvian and Estonian languages.

Package has four removable adhesive labels for traceability which can be removed and attached without using glue to registration journal. Information on the sticker: product REF code, UDI code/barcode/QR code, date of manufacture, LOT number, expiration date.

Package has peel-open part for opening and arrow which shows correct opening direction

Drapes are folded it is convenient way to unfold them and cover the patient correctly. The drapes have icons showing the unfolding directions

Drape made from 2 layers fabric: upper layer made from hydrophilic polypropylene that has perfect absorbent properties, lower layer made from thick polyethylene that 100% impermeable to liquids.

4.Packing Details

Primary Packing	Pouch Size	Each Pouch Weight
Paper Plastic pouch	30×40cm	

Secondary Packaging	Box size(estimated)	Quantity per Dispenser Box
Dispenser box	38×28×32cm	10 pcs

Outer Packaging	Carton size(estimated)	Dispenser Boxes per Export Carton
Export Carton with dispenser box	58×40×34cm	2 boxes

5.Sterilization Method

Ethylene Oxide (EO) Sterilized

6.Certifications

ISO 13485; CE

7.Shelf Life

5 year
