

Features HIBARRY®

1. 100% natural absorbable biomaterial
Made exclusively from HA without synthetic cellulose or polymer – completely bio-based, **pH 7 (neutral)**, degradable and particularly safe
2. Optimized barrier gel
For ideal barrier time & absorbability > Ideal combination with cross-linked HA and natural HA **to prevent adhesion and disappearance (instant resorption)**
3. Excellent viscosity
No unwanted migration, **remains in position**. Injectable adhesion barriers may flow away from the target > Due to high viscosity and elasticity it will stay on the target

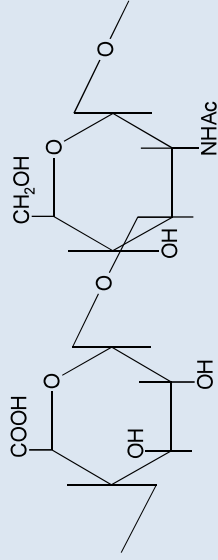

KYERON

BRIDGING MEDICAL GAPS

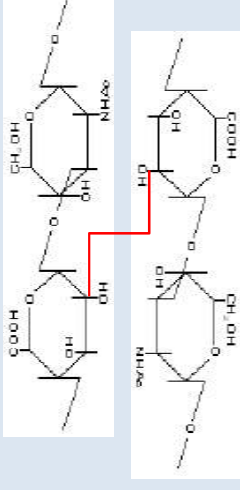

Features HIBARRY®

BMI KOREA

Hyaluronic acid (HA)

Cross linked HA

- Only HA (hyaluronic acid), nothing else
- Cross-linked hyaluronic acid will significantly slow down the enzymatic breakdown
- 100% bio-resorbable product > no chemical components

KYERON

BRIDGING MEDICAL GAPS

Indications HIBARRY®

Confirmation for use in the following indications

- Gynaecology
- Hysterectomy
- Spine surgery
- General surgery
- Endometriosis
- Abdominal laparoscopy
