

# POLYPROPYLENE

BLUE

## 3.1. Nesirezorbuojantys monofilamentiniai siūlai. Cheminė medžiaga- polipropilenas

|                 |                                                      |
|-----------------|------------------------------------------------------|
| Type            | Monofilament Monofilamentiniai                       |
| Composition     | Polypropylene, a polymer of propylene Polipropilenas |
| Coating         | None                                                 |
| Colour          | Blue                                                 |
| Tissue reaction | Minimal                                              |
| Absorption      | Non absorbable Nesirezorbuojantys                    |
| Presentation    | Box with 12 sutures                                  |
