independently certified from von 50 bis 150 KV

Welcome at Medical Index

In 1997 we started on the development and production of high-quality radiation protection aprons. It is our aim to offer our customers the best protective clothing they need for their daily work.

On the following pages you will only find our product range. If you look for specific solutions, please contact us. We can do more than we can show you here, and we look forward to new challenges. Protecting you as best as possible - that is our passion.

Medical Index makes the difference

Our products are characterized by the use of high quality materials, individual cuts and special solutions for the user.

1.

Our cover-material: high quality, individual, hygienic

- MATRIX: high quality, unique and hygienic. An cover-material that is resistant to all common disinfectants. Tested according to ASTM F1670 (2008): "Resistance to penetration by synthetic blood" and ASTM F1671 (2013): "Resistance to penetration by pathogens contained in the blood".
- Standard colors: versatile, individual and proven. In addition to the many plain colors, you can choose from various design patterns.

You can find our current color selection here www.medical-index.de

Our Lead Material. Three choices, one mission: X-Ray Protection from 50 to 150 KV

- Standard lead (SL)
- **Vector X Bilayer Lead free (NL)**
- Vector X Bilayer Light Lead (LL): our light and flexible protective material, which offers an exceptionally high level of protection thanks to a bilayer technology.

Vector X is a protective material that consists of a real two-sided construction: The inner side is made of lead and thus shields the fluorescent radiation from the body. Vector X can be used in all areas because it is certified from 50 to 150 kV, but is just as light and flexible and has the same tensile strength as traditional protective materials. It goes without saying that our products are certified according to EN 61331-1 + 3: 2014.

Apron with one-sided shoulder and back closure.

Closure Type: Snap-lock

Optional: TS, MTS, CTS, POCKET

X-Ray Protection Aprons

Skirt & Vest

Double Protection – half the weight on the back

Our Skirt and Vest models reduce the strain on the back to a minimum. More than half of the weight is on the hips, and the cut of the vests also significantly reduces the load. All models comply with the IEC EN 6133-1: 2014 standard.

As with the double aprons, we also offer a model without Velcro for our costumes. We are confident, you will find the right one for you from a total of seven models.

All vests have shoulder pads and the skirts have practical hangers for better storage.

5.4, 7.4

Please note that each vest model offers different levels of comfort depending on the armhole.

1.7

Model WESV Art.-No.: WESV

Our wrap vest with flexible back and fastener on the shoulder and in the frontal abdominal area.

Closure types: Velcro, Magnet

Optional: TS, MTS, CTS, ELBELT, CUTOUT

Model SV Art.-No.: SV

5. 5.1
7. 7.1

Our classic costume: skirt and vest with frontal overlap and tight application of the fastener.

5.3, 5.4
7.4

Closure type: Velcro

Optional: ITS, TS, MTS, CTS, ELBELT, ISLEEVE, **SLEEVE**, CUT-OUT
7.4

Model BRSV Art.-No.: BRSV

Vest with frontal fastening in the middle allow the vest to be put on more quickly.

Closure types: Velcro, Magnet

Optional: TS, MTS, CTS, ELBELT, ISLEEVE, SLEEVE, WING, MWING

Model CardiSV Art.-Nr.: CSV

The closure on the shoulder and the side allows for comfortable putting on.

Closure types: Velcro, Magnet

Optional: TS, MTS, CTS, ELBELT, CUT-OUT

Model Magnet-Wrap Art.-Nr.: MWSV

Our wrap vest with a flexible back and magnetic fastener for easy opening. The accompanying skirt is a standard skirt and can be provided with a elastic backpart on request.

Closure type: Magnet

X-Ray Protection Aprons

X-ray Protection for Dental medicine

4.

Protection for Dental applications.

Dental x-rays are of great importance in diagnosing the oral condition. With the help of X-rays, a variety of tooth and oral diseases can be detected at an early stage.

X-rays are taken at regular intervals - optimal protection for the patient is therefore necessary.

We offer all models with a lead equivalent of 0.25; 0.35 or 0.50 mm Pb.

4.3

Please refer to the respective models for the corresponding sizes.

4.1 4.5

Model Radio Art.-No.: DTL

Wide shoulder part and frontal length offer an optimal protection for frontal and dental exposures. Optional with integrated thyroid protection (see picture).

Closure Type: Velcro

Optional: ITS

Size: Length = 70 cm, Width = 60 cm

4.1 4.5

Model Semi-Radio Art.-No.: DSR

This dental apron is quick to put on, comfortable and protects the most important upper areas. With integrated thyroid protection.

Closure type: Velcro

Size: Length = 35 cm, Width = 70 cm

Model Panorama

Art.-No.: OPT

This all-round protection is especially suitable for panoramic shots.

Closure type: Velcro

Optional: TS, MTS, CTS

Size: Length = 75 cm, Width = 48 cm

X-Ray Protection Aprons

X-ray Protection for Children

Big Protection for our small Patients

In principle, we can offer you all models from our range in children's sizes. You can find the most important and popular aprons here. All aprons are also equipped with shoulder pads. The standard lead equivalent is 0.50 mm Pb at the front and 0.25 mm Pb at the rear.

Length: 50, 60, 70 cm

Model KA Art.-No.: KA

The classic front apron here with a Velcro strap on the front.

Model BRKA Art.-No.: BRKA

A double apron for easy donning, here provided with an elastic snap fastener belt.

Children-Roundhat Art.-No.: KRHAT

Our round head protection in child size protects the head optimally. With a rubber and cord stopper to tighten and adjust the size.

X-Ray Protection Aprons

X-ray Protection for Patients

**Because Protection can be made
easy**

Protecting patients is an everyday challenge where high demands are placed on the protective material. It is used frequently and should therefore not only be robust but also easy to use. With MI patient protection products you are on the safe side.
