

Acknowledged experience of ASAHI INTECC in Toruqe has put its best
into the new product for Neurovascular - ASAHI CHIKAI -

ASAHI CHIKAI

Neurovascular Guide wire

ASAHI CHIKAI combines the prominent knowledge and long experience of
ASAHI INTECC in the field of stainless steel core PCI guidewires.
Its original and superb features relate to Tip flexibility, Torque performance
and Trackability.

Tip flexibility

The original tapered core
composition of the tip
enhances flexibility due to
reduced tip load, minimizing
the risk of vessel trauma.

Torque performance

Through implementation of
ACT ONE (using original
hollow wire rope) torque
performance is improved.

Trackability

Device tracking and deliver-
ability is easily performed due
to 170cm hydrophilic coating
(distance from the tip).

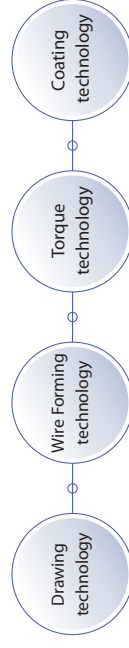

Lineup

Keeping in line with physicians'
needs, 200cm standard size and
300cm exchange version are
available.

0.014 inch Guide Wire from ASAHI INTECC.

Core Technologies

Only One. Number One. ASAHI INTECC 4 CORE TECHNOLOGIES.

Composite Core

Hydrophilic coating (Polymer coat) SLIP COAT® coating
