Introducing ORTHO RESOLVIGEN™ 4. Expert antibody identification software that helps you deliver the right results to the right patient at the right time. Every time.

Along with our next-generation VISION™ Analyzer and world-class education and support services, RESOLVIGEN™ 4 is part of Ortho's comprehensive, fully integrated and completely scalable transfusion medicine solution. For the life of your lab.

Introduce your experts to ours.

Antibody identification is one of your lab's most complex tasks. ORTHO RESOLVIGENTM 4 software supports your expertise by filtering results faster and with greater clarity than ever before – so you can make informed decisions and deliver the best patient care.

The best of both worlds.

RESOLVIGENTM 4 combines the efficiency of automation with the flexibility of customization:

- Total automation (from order to transfer to the LIS)
- Standardized diagnosis capabilities
- Customizable reporting for patients, tests, rare red blood cells and panels
- Rare red blood cell bank for complex identification

The difference is clear.

RESOLVIGENTM 4 software enhances clarity:

- Comprehensive explanation of results
- Updated reference library that supports conclusions
- Intuitive interface
- Enhanced reactions and additional testing recommendations

Expertise at your fingertips.

RESOLVIGENTM 4 gives you easy access to comprehensive information:

- 322 antibodies with serological and clinical information and bibliography references
- 40 immunohematology procedures to assist in resolution of complex serological cases
- Downloadable antigram data that can be uploaded into the RESOLVIGENTM 4 software
- Complete database, including images of all immunized patients on a local, departmental or regional level

For more information, please contact your Ortho Clinical Diagnostics representative or visit www.orthoclinical.com.

COMPATIBILITY

ORTHO RESOLVIGENTM 4 is compatible and integrates with both ORTHO AutoVueTM Innova and ORTHO VISIONTM Analyzer.

ORTHO RESOLVIGENTM 4 can also operate in a stand-alone configuration. ORTHO RESOLVIGENTM 4 works with ORTHO Antibody Identification Panels (ORTHO RESOLVE[®] A, ORTHO RESOLVE[®] B and ORTHO RESOLVE[®] C – 0.8% or 3%) and Antibody Screening Panels (SURGISCREEN[®], SELECTOGEN[®], or BioVue[®] screen – 0.8% or 3%), and EFS UPR panels.
