# Phantas S1User Manual

View Alerts

Precautions:
If the alarm cannot be eliminated according to the solutions provided, please contact the GS-Robot engineer in a timely manner.

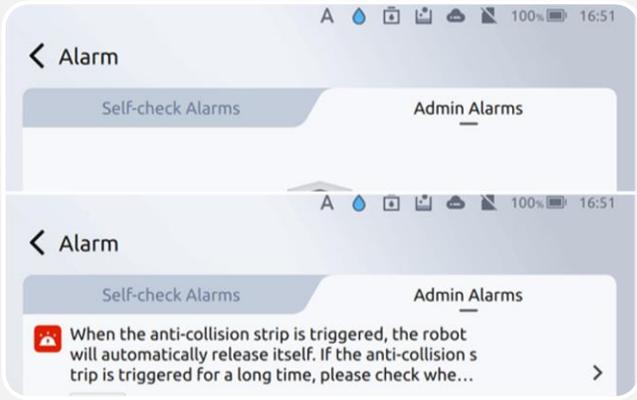

Screen Operation: If the screen is locked, you need to log in with a password first, then tap "Alarms" in the lower right corner.

1

When an abnormal alarm occurs in the machine, there will be a red pop-up window at the bottom of the screen. Click "View Details" to quickly check the alarm information.

注

1. The machine is normal with no alarm information.
2. The machine has an abnormality with alarm information.
