### *Excellent premium*

Professional microfibre mop with cotton

Colour: white/blue

Material: 30% microfibre, 10% rayonfibre  
30% polyester, 30% cotton

Width: 50 cm

#### Characteristics

- Tear-proof pockets and special sewing technique
- 450– 500 washes by normal wash process
- Washing temperature of 40 – 95 degrees
  
- Max. 2% shrinkage after the first wash

Through a special tufting method, the loops are fitted securely into the mop's textile cover.

What's new about this mop is that it consists of 4 different materials. The application of this mixture of 30% microfibre, 10% rayonfibre, 30% polyester and 30% highly-absorbent cotton assures an optimal dirt removal, gliding ability and long life span, also when using disinfection agent.

#### Features

Due to the height and depth of the loop array in the inner section of the mop face, an excellent cleaning effect is achieved with ideal sliding action. This means that even stubborn, heavily encrusted dirt can be removed.

#### Suggested Use

A special hospital-grade hygienic mop for use in clinics, retirement and nursing homes and public facilities.
