

ASAHI Corsair

Microcatheter

ASAHI Corsair 135cm for the antegrade approach

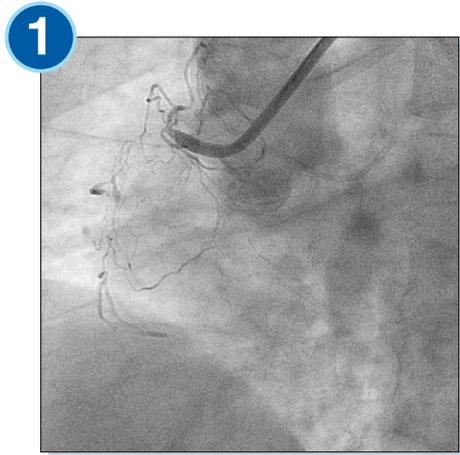

Improved GW manipulation
 GW back-up support for lesion crossing
 Good lesion crossability

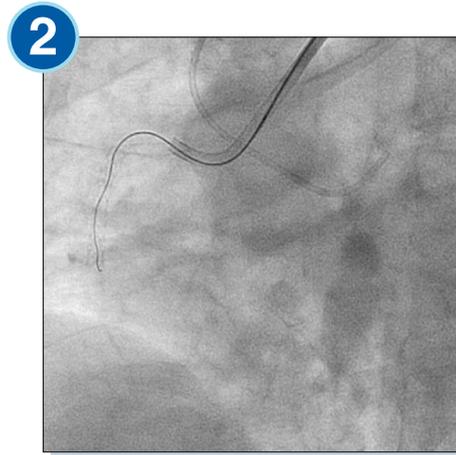

ASAHI Corsair's 0.016" tip profile assists in lesion crossing; the 0.016" tip is a 12% size reduction compared to the next smallest microcatheter.

Rotating while pushing allows the catheter to advance farther than pushing alone. ASAH Corsair transmits the rotation to the distal end of the catheter, allowing further advancement with less pushing.

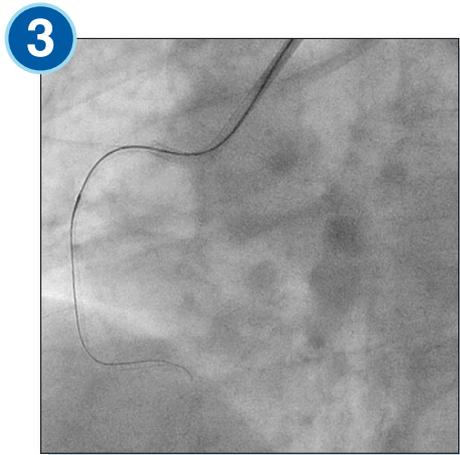

ASAHI Corsair 135cm – Clinical Benefits

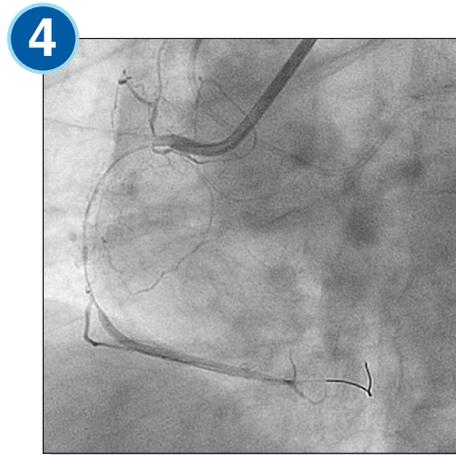

RCA In-Stent Occlusion

Wire can not advance unaided

Corsair provides support, improving wire manipulation and allowing the wire to cross the lesion

Corsair is also able to cross the lesion and enlarge the channel
