

rasanTEC® System THE NEW DIMENSION OF PRODUCTIVITY

rasanTEC® system reflects the systematic approach of Ecolab. It is a new system consisting of especially developed and designed mops and mop holder. The **rasanTEC®** mops are patented and are made out of 100 % state-of-the-art microfiber. These robust and light mops stand for high cleaning performance, excellent cleaning results and outstanding durability, four mops for a choice of performance (20, 40 or 60 sqm). The enhanced **rasanTEC®** mop holder allows a "touch-free" mop pick-up and mop disposal. The unique shape protects against thefts and the robust construction ensures a reliable operation and a long life.

- **Clean** - Ideal cleaning results, even on micro porous floors (e.g. finestone) due to high quality microfiber material with abrasive gliding strip.
- **Safe** - Less bending & no mop contact lead to less tiring and more productivity as well as to more hygiene and safety.
- **Efficient** - Four mops for a choice of performance (20, 40 or 60 sqm).

USE INSTRUCTIONS

- 1 Slide the holder into the strap.
 - 2 Open the holder by pressing the metal plate.
 - 3 Push the holder downwards till it clicks.
- For **rasanTEC® TrioStar**:
- 4 After wiping with the first side, lift the holder.
 - 5 Turn the mop upside-down and wipe with the other side.

WASHING RECOMMENDATION

Primary Wash: Generally we recommend to wash (60 °C) all mops prior to use, as it removes the spinning aid substances from the yarn which results in a better cleaning performance and water absorption.

Further Washing: We recommend the especially developed detergent mopEltra®. It ensures a hygienic and disinfected mop washing at 60 °C and in addition offers excellent low foaming, superior washing performance and significant cost savings (no pre-wash programme necessary).

Additional Recommendations:

- Avoid bleaching with aggressive bleaching procedures (e.g. chlorine);
- Washing at 90 °C is possible, however it reduces the durability;
- Do not use fabric softeners;
- Drying in the tumble dryer at low temperature only.

SPECIAL NOTES / INFORMATION

For professional use only!

Position warning sign „Attention wet floor“ and leave in place until surface is totally dry.

PRODUCT PROPERTIES

rasanTEC® mops:

- 100 % high quality microfiber material with abrasive strip for an ideal cleaning result, even on micro porous floors;
 - High water absorption capacity and excellent & constant water release results in a high sqm-performance and shorter drying times;
 - Long life cycle and low washing costs due to ideal washability;
 - Best gliding performance leads to more ergonomics for the operator;
 - Mop holding straps lead to a lower weight, higher hygiene standard and longer life time;
- Dry weight: rasanTEC® MonoStar: 84 g
 rasanTEC® DuoStar: 125 g
 rasanTEC® TrioStar: 205 g
 rasanTEC® hygiene: 160 g

rasanTEC® mop holder:

- Recessed edges allow easy mop pick-up;
- The hook enables „touch-free“ mop disposal and leads to less tiring and more safety.

PACK SIZE

rasanTEC® mop holder, 40 cm:

1 x 25 pieces per box,	10011674
rasanTEC® MonoStar 40 cm,	10000001
rasanTEC® DuoStar: 40 cm,	10004810
rasanTEC® TrioStar: 40 cm,	10004813
rasanTEC® hygieneplus 40 cm,	10200046
