Product name:	LigaV® Ligating Clips	Product generic group	Ligating Clips
Class	IIb – rule 8	GMDN Code	35649

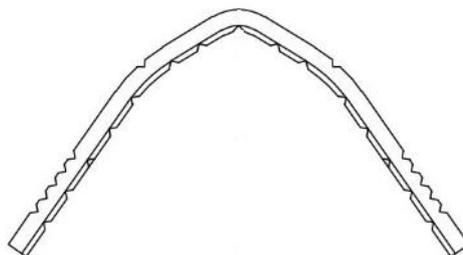

Intended use:

Marking and/or ligating of any tissue structures or vessels during an operation for  haemostasis or marking purposes. The product can be used only by the qualified medical personnel.

Product description:

LigaV® ligating clips are implantable medical devices made of medical grade titanium, which ensures proper level of biocompatibility. The LigaV® clip is formed into a V-shape from a rectangular wire with the appropriate serrations on the inner side of the clip that enhance its grip on the tissue and enable its proper nourishment. The outer serration helps to grip the clip in the applicator's jaws and gives better stability of the clip.
