

SPT Quote number vs Catalogue Number

The 27th November 2019

To whom it may concern

Medline is a procedure pack producer. Medline Sterile Procedure Trays (SPTs) being individually created customized packs according to specific hospital needs.

As custom packs are customer specific, when the product is created as a sample, a quote number is allocated to it, which is then switched to a catalogue reference number only after the pack goes into routine production.

We inform you that for each custom pack the reference number instead of current quote number will be provided in case of contract.
