

Article number: 1.041.04

Measurements

- Tip width / thickness: 33mm / 17mm
- Optimal length / Maximum length: 90mm / 110mm

Preferred by doctors

- smooth **single-handed operation** and locking
- **hands-free** after placement
- inwardly folded edges **facilitate optimal Cervix orientation**
- front handle design angled backwards providing **greater freedom of movement**
- **no preheating** required
- **virtually unbreakable** plastic
- excellent product strength through **optimised design**
- up to **50% cost reduction**

Loved by patients

- "smooth" **rounded edges** ensuring patient comfort
- design **prevents "pinching"**
- single use - **guaranteed clean**
- patient **temperature friendly**
- **clinical** white or visible clear look

Article number: 1.041.05

Measurements

- Tip width / thickness: 33mm / 15mm
- Optimal length / Maximum length: 110mm / 130mm

Preferred by doctors

- smooth **single-handed operation** and locking
- **hands-free** after placement
- inwardly folded edges **facilitate optimal Cervix orientation**
- front handle design angled backwards providing **greater freedom of movement**

Article number: 1.031.34

Measurements

- Tip width / thickness: 33mm / 17mm
- Optimal length / Maximum length: 90mm / 110mm

Advanced open design

- **advanced high-quality** speculum designed for single use.
- **open** on one side, for an unobstructed view and optimal access.
- **patented hinge design** provides high stability and rigidity
- optional slimline **smoke extraction** channel

Preferred by doctors

- advanced **open design** on one side
- smooth **single-handed operation** and locking
- **hands-free** after placement
- inwardly folded edges **facilitate optimal Cervix orientation**
