Watering bottles

Watering bottles F30 and F75 have been in production for over 45 years and are still being manufactured consistently using superior quality material. The shapes that we offer have influenced the entire market.

We do provide our bottles both with a silicone ring and with a conical neck. The watering bottles are made of polycarbonate (=Makrolon, max. 121°C autoclavable) or made of polysulfone (max 134° autoclavable).
